TEXAS BOND REVIEW BOARD

2021 LOCAL GOVERNMENT ANNUAL REPORT FISCAL YEAR ENDED AUGUST 31, 2021

Texas Bond Review Board Local Government Annual Report 2021

Fiscal Year Ended August 31, 2021

Greg Abbott, Governor Chairman

Dan Patrick, Lieutenant Governor

Dade Phelan, Speaker of the House of Representatives

Glenn Hegar, Comptroller of Public Accounts

Rob Latsha Executive Director

January 2022

ii

Executive Summary

The Texas Bond Review Board (BRB) has no direct oversight of local government debt issuance. Chapter 1231 of the Texas Government Code requires the BRB to prepare statistical reports on local government debt. This information on debt issued by political subdivisions is primarily prepared by the issuer, collected by the Office of the Attorney General (OAG) as a part of the review and approval procedures as required under Chapter 1202 of the Government Code, and then forwarded to the BRB for its report on local debt statistics. Data that has not been provided to the BRB on intergovernmental loans, privately placed loans, or any other debts that is not in the form of a public security are not reflected in this report. Also, pursuant to Texas Government Code, Section 1202.008, conduit debts incurred by nonprofit corporations created by the local governments are not required to provide issuance information to the BRB. As a result, conduit debt is not reflected in this report and presented in *Appendix B, Texas Local Government Conduit Debt*, and certain data presented in *Appendix F, Commercial Paper*. The data in this report and on the website is compiled from information provided to the BRB form various sources and has not been independently verified.

The BRB separates the local government issuances into seven categories: Cities, Towns, Villages (Cities); Public School Districts (School Districts); Water Districts and Authorities (WD); Counties; Other Special Districts and Authorities (OSD); Community and Junior College Districts (CCD); and Health/Hospital Districts and Authorities (HHD).

Major Findings

- As of fiscal year-end 2021, Texas local governments had \$266.38 billion in outstanding debt, an increase of \$47.40 billion (21.6 percent) over the past five fiscal years. Of that amount, 65.5 percent (\$174.54 billion) is tax-supported general obligation (GO) debt secured by local ad valorem tax collections, while the remaining 34.5 percent (\$91.85 billion) is secured by revenues generated by various projects such as water, sewer, and electric utility fees (Chapter 1).
- Over the past five fiscal years, local government debt issuance increased by 58.6 percent (\$17.52 billion) from \$29.92 billion in fiscal year 2017 to \$47.44 billion in fiscal year 2021. During that period, new money issuance increased by 26.2 percent (\$4.83 billion) from \$18.43 billion to \$23.27 billion. Refundings increased by 110.4 percent (\$12.69 billion) from \$11.49 billion to \$24.17 billion (Chapter 1).
- Over the past five years, School Districts have consistently accounted for the highest amount of tax-supported debt outstanding, while Cities and WD accounted for the second and third highest amounts, respectively (Chapter 2).
- The most recent U.S. Census Bureau data for total state and local debt outstanding show that for census year 2019, Texas was the nation's second most populous state, and it ranked third among the 10 most populous states in terms of total (GO and revenue) local debt per capita, seventh in state debt per capita, and fourth in total state and local debt per capita with 82.2 percent of the state's total debt burden at the local level (Chapter 1). (According to Moody's 2021 State Debt Medians, Texas' state debt net tax-supported debt per capita ranked second lowest when compared to that of the nine other states rated AAA.)

- Capital Appreciation Bond (CAB) par issued for Texas local governments during fiscal year 2021 was 0.3 percent (\$124.9 million) of the total CAB and current interest bond (CIB) debt issued (\$47.44 billion). School Districts issuances accounted for 95.1 percent (\$118.7 million) of the total CABs issued for local governments during fiscal year 2021. In fiscal year 2021, CAB maturity amounts accounted for 2.4 percent (\$9.27 billion) of the total debt service outstanding, including both CAB and CIB (Chapter 4).
- Since fiscal year 2012, certificates of obligation (CO) debt outstanding has increased by 37.0 percent (\$4.63 billion) from \$12.51 billion outstanding in fiscal year 2012 to \$17.15 billion outstanding in fiscal year 2021, and Cities accounted for 79.6 percent of the total CO debt outstanding at fiscal year-end 2021 (Chapter 5).
- As of fiscal year 2021, tax-supported CO debt for Cities accounted for 36.5 percent (\$13.65 billion) of the total Cities tax-supported debt outstanding, while Counties CO debt accounted for 22.5 percent (\$2.88 billion) of total Counties tax-supported debt outstanding. HHD CO debt outstanding accounted for 25.2 percent (\$608.0 million) of total HHD tax-supported debt outstanding (Chapter 5).
- During fiscal year 2021, a total of 151 local governments held 311 bond elections approving 86.9 percent of the total election amount for a potential issuance of \$18.50 billion of additional debt. Approximately 28 local governments cancelled 65 elections during the Nov 3, 2020, elections. Separately, on November 2, 2021, 91 local governments held 174 bond elections, with 61 local governments approving 109 bond elections totaling \$8.31 billion (Appendix A).
- Excluding conduit debt, private placements, and short-term notes, the weighted average for total cost of issuance (COI), including underwriter's spread, increased to \$15.20 per \$1,000 in 2021 from \$14.88 per \$1,000 in 2020. The average transaction size decreased slightly to \$27.0 million in 2021 from \$27.6 million in 2020 and the average fee increased slightly to \$410,603 in 2021 from \$410,532 in 2020. Tax-supported competitive transactions generally had the highest cost per \$1,000 for smaller transaction sizes (Appendix D).
- Of the \$4.71 billion of charter school debt outstanding as of October 31, 2021, an estimated \$3.35 billion was guaranteed by the Texas Permanent School Fund Bond Guarantee Program (Appendix C).
- Approximately 83 issuers that issued debt in fiscal year 2021 received a tax-supported general obligation (GO) rating upgrade, and 21 issuers received a GO rating downgrade from at least one of the three major credit rating agencies, Fitch Ratings, Moody's Investors Service, and Standard & Poor's (Appendix H).

For limitations on the purpose and use of this report, see the disclosure preceding Chapter 1.

Cautionary Statements

Section 1202.008 of the Texas Government Code authorizes the Office of the Attorney General to collect local debt information and to send that information to the Texas Bond Review Board (BRB) for inclusion in debt statistic reports. Chapter 1231 of the Texas Government Code requires the BRB to submit biennial reports with such data to the legislature. This report is intended to satisfy this Chapter 1231 duty.

The data in this report and on the BRB's website is compiled from information reported to the BRB from various sources and has not been independently verified. The reported debt and defeasance data may vary from actual debt outstanding, and the variance for a specific issuer or types of or all issuers could be substantial.

Local governments are not required to report data for debt that either is not considered a public security as defined by state statute, e.g., a loan not evidenced by a note or evidenced by a note payable to order, or does not require approval by the Office of the Attorney General of the State of Texas, such as certain short-term notes, certain bond anticipation notes, and certain lease purchase agreements for personal property. Consequently, the BRB does not receive information on many privately placed loans or intergovernmental loans. such as State Infrastructure Bank loans for transportation or water development state participation loans that are not evidenced by a public security. In addition, debt issuances for some component corporations, and other conduit entities, such as housing finance corporations, industrial development corporations, and other conduit entities, are not reported to the BRB. Outstanding debt excludes debt for which sufficient funds have been escrowed to retire the debt either from proceeds of refunding debt or from other sources, if reported to the BRB. Debt totals, percentages, trends, and other data are based entirely on debt and defeasances reported to the BRB.

Future debt repayment and debt-service information for variable-rate, commercial paper, and other short-term and demand debt is estimated on the basis of interest rate and refinancing assumptions described in the report. Actual future data could be affected by changes in issuer financing decisions, prevailing interest rates, market conditions, and other factors that cannot be predicted. Consequently, actual future data could differ from the estimates, and the difference could be substantial. The BRB assumes no obligation to update any such estimate of future data.

Historical data and trends presented are not intended to predict future events or continuing trends, and no representation is made that past experience will continue in the future.

This report is intended to meet Chapter 1231 requirements and inform state leadership and the Legislature. This report is not intended to inform investors in making a decision to buy, hold, or sell any securities, nor may it be relied upon as such. Data is provided as of the date indicated and may not reflect debt, debt service, population, or other data as of any subsequent date. This data may have changed from the date as of which it is provided. For more detailed or more current information, see the issuers' websites or their filings at Electronic Municipal Market Access (EMMA®). The BRB does not control or make any representation regarding the accuracy, completeness, or currency of any such site, and no referenced site is incorporated herein by reference or otherwise.

Chapter 1 Texas Local Debt in Perspective

Overview

Local governments in Texas issue debt to finance construction and renovation of government facilities (e.g., schools, public safety buildings, city halls, and county courthouses), public infrastructure (e.g., roads, water, and sewer systems), and various other projects authorized by law. Key factors that affect a government's need and ability to borrow funds for infrastructure development include population changes, revenue sources, tax rates and levies, interest rates, and construction costs. Local governments issue two main types of debt: tax (general obligation or GO) and revenue. GO debt is secured by the full faith and credit of the issuer's ad valorem taxing power while revenue debt is secured by a specified revenue source. Tax-supported debt includes debt secured by a combination of ad valorem taxes and other revenue sources, even though the debt may be paid in whole or in part from non-tax revenue. Tax-supported debt generally must be voter approved (with the exception of Certificates of Obligation, tax notes, school district maintenance tax notes, certain time warrants, and certain other obligations).

State law sets limitations on certain local government debt issuers by setting maximum ad valorem tax rates per \$100 of assessed property valuation. These rates vary by government type, but all must generate sufficient funds based on annual ad valorem tax collections to provide for the payment of the debt service on outstanding and projected ad valorem tax (GO) debt. Additionally, all public securities issued by local entities must be approved by the Office of the Attorney General – Public Finance Division (OAG) and registered with the Texas Comptroller of Public Accounts (CPA).

Texas Bond Review Board and Local Government Debt

The Texas Bond Review Board (BRB) has no direct oversight of local government debt issuance. Chapter 1231 of the Texas Government Code requires the BRB to prepare statistical reports on local government debt. This information on debt issued by political subdivisions is primarily prepared by the political subdivision, collected by the OAG as a part of the review and approval procedures as required under Chapter 1202 of the Government Code, and then forwarded to the BRB for its report on local debt statistics. Intergovernmental loans, privately placed loans, and any other debts that are not in the form of a public security are not reflected in this report. Also, conduit debts incurred by nonprofit corporations created by the local governments are not reflected in this report except for data presented in *Appendix B, Texas Local Government Conduit Debt*, and certain data presented in *Appendix F, Commercial Paper*. The data in this report and on the website is compiled from information provided to the BRB from various sources and has not been independently verified.

All reporting on local debt is presented on the agency's website, the BRB Data Center, and the Texas Open Data Portal. Visitors to the BRB website can search databases, access the data center, and access the Data Portal to download spreadsheets that contain debt outstanding, debt issuances, debt ratios, and population data as available by government type at each fiscal year-end. In fiscal year 2021, a monthly average of approximately 3,514 different users of the BRB's website downloaded various datasets containing Texas local government debt data. The BRB posts this information to its website, the data center, and the Data Portal annually within four months after the close of the state's fiscal year. Additionally, this data is supplied to the CPA's office as well as the Legislative Budget Board and the *Texas Tribune* for publication on their debt pages.

The BRB separates the local government issuances into seven categories: Cities, Towns, Villages (Cities); Public School Districts (School Districts); Water Districts and Authorities (WD); Counties; Other Special Districts and Authorities (OSD); Community and Junior College Districts (CCD); and Health/Hospital Districts and Authorities (HHD).

The data in this report and on the website is compiled from information provided to the BRB from various sources and has not been independently verified.

Local Government Debt Outstanding

As of fiscal year-end 2021, Texas local governments had \$266.38 billion in outstanding debt (Table 1.1), an increase of \$47.40 billion (21.6 percent) over the past five fiscal years. Of that amount, 65.5 percent (\$174.54 billion) is GO debt secured by local ad valorem tax collections, while the remaining 34.5 percent (\$91.85 billion) is secured by revenues generated by various projects such as water, sewer, and electric utility fees. Over the past five fiscal years, tax-supported debt outstanding increased 22.6 percent (\$32.18 billion), and revenue debt outstanding increased 19.9 percent (\$15.22 billion).

School Districts accounted for 36.7 percent (\$97.79 billion) of all local debt outstanding, and Cities accounted for 31.6 percent (\$84.24 billion). WDs held the third highest percentage and accounted for 14.9 percent (\$39.69 billion) of all local debt outstanding. The remaining 16.8 percent (\$44.67 billion) was held by CCDs, Counties, HHDs, and OSDs.

The most recent U.S. Census Bureau data for total state and local debt outstanding shows that for census year 2019 (the most recent data available), Texas continued to be ranked second in population, third among the 10 most populous states in terms of local debt per capita, fourth in total state and local debt per capita, and seventh in state debt per capita (Table 1.2).

Sources: U.S. Census Bureau, State and Local Government Finances by Level of Government and by State: 2019, the most recent data available. U.S. Census Bureau, Population Division, July 2020 (Release Date: December 2020).

Over the past 10 years, local government total debt (tax-supported plus revenue) increased \$80.72 billion (43.5 percent). Over this time, the state's population increased by an estimated 14.5 percent (3.7 million), based on July 2020 U.S. Census Bureau population estimates (released December 2020). During that same period, local government total debt outstanding per capita increased by 25.3 percent, or \$1,833 per person, from \$7,240 per capita in fiscal year 2012 to \$9,073 per capita in fiscal year 2021 (*Figure 1.1*).

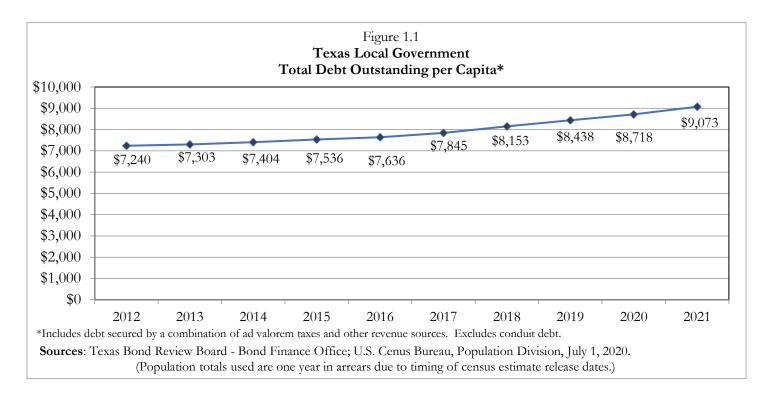

Table 1.3 lists the state's local debt outstanding by category from highest to lowest total amount outstanding.

Rate of Debt Retirement

Timely repayment of debt is an important factor used by rating agencies to assess a municipal issuer's financial performance. As a guideline, rating agencies look for a repayment schedule that retires 25 percent of principal one quarter through the life of the debt and 50 percent halfway through the life of the debt. Generally, local governments issue debt with varying maturities up to 40 years.

Table 1.4 illustrates the amount of debt retired in the next five-, 10-, and 20-year periods for both tax-supported and revenue debt outstanding as of fiscal year 2021.

Debt Issuance and Use of Proceeds

Over the past five fiscal years, local government debt issuance increased by 58.6 percent (\$17.52 billion) from \$29.92 billion in fiscal year 2017 to \$47.44 billion in fiscal year 2021. During that period, new money issuance increased by 26.2 percent (\$4.83 billion) from \$18.43 billion to \$23.27 billion. Refundings increased by 110.4 percent (\$12.69 billion) from \$11.49 billion to \$24.17 billion (*Table 1.5*).

During fiscal year 2021, 51.0 percent of local debt issuance was used to refund debt, 20.5 percent was used to finance educational facilities and equipment, 9.6 percent was used to finance water-related infrastructure, 9.9 percent was used for general purpose debt (such as building or improving city halls and court houses), and 2.8 percent was used to finance toll road projects. Water-related financings are likely understated because some issuers, especially Cities, borrow for multiple purposes, over half of which involve financings for water and transportation purposes. The remaining 6.0 percent of local debt issuance was used for multiple purposes, including combined utility systems, commerce, computer technology, economic development, fire safety, health related, housing and land, power, prisons and detention centers, public safety, recreation, and solid waste.

Chapter 2 Texas Local Government Tax-Supported Debt

Overview

Tax-supported debt includes debt secured by a combination of ad valorem taxes and other revenue sources, even though the debt may be paid in whole or in part from non-tax revenue. Tax-supported debt generally must be voter approved, with the exception of Certificates of Obligation, tax notes, school district maintenance tax notes, certain time warrants, and certain other obligations.

State law sets limitations on certain local government debt issuers by setting maximum ad valorem tax rates per \$100 of assessed property valuation. These rates vary by government type, but all must generate sufficient funds based on annual ad valorem tax collections to provide for the payment of the debt service on outstanding and projected ad valorem tax (general obligation or GO) debt. Additionally, all public securities issued by local debt issuers must receive approval from the Office of the Attorney General – Public Finance Division (OAG) and be registered with the Texas Comptroller of Public Accounts.

Local Government Tax-Supported Debt Outstanding

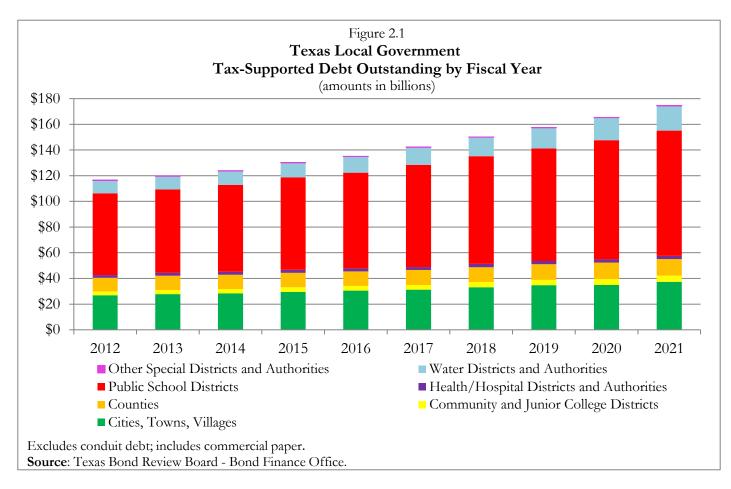

As of fiscal year-end 2021, Texas local governments had \$174.54 billion in outstanding tax-supported debt, an increase of \$9.14 billion (5.5 percent) over the 2020 total of \$165.40 billion, and a 22.6 percent (\$32.18 billion) increase over the past five fiscal years, from \$142.35 billion in 2017 *(Table 2.1)*.

Source: Texas Bond Review Board - Bond Finance Office.

Over the past 10 fiscal years, tax-supported debt outstanding has increased \$58.0 billion (49.8 percent) from \$116.54 billion in 2012. *Figure 2.1* illustrates local tax-supported debt outstanding by local government type over the past 10 fiscal years.

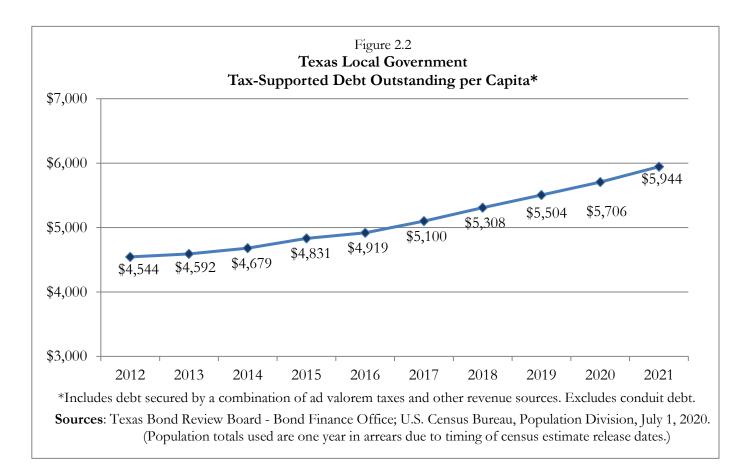

As shown in *Table 2.1* and *Figure 2.1*, Public School Districts (School Districts) have consistently accounted for the highest amount of tax-supported debt outstanding, while Cities, Towns, Villages (Cities) and Water Districts and Authorities (WD) accounted for the second and third highest amounts, respectively.

Of the total Cities tax-supported debt outstanding, the Big 6 Cities (Houston, Dallas, San Antonio, Austin, El Paso, and Fort Worth) accounted for an average of 32.2 percent over the last five years and 32.8 percent over the last 10 years.

Tax-Supported Debt per Capita

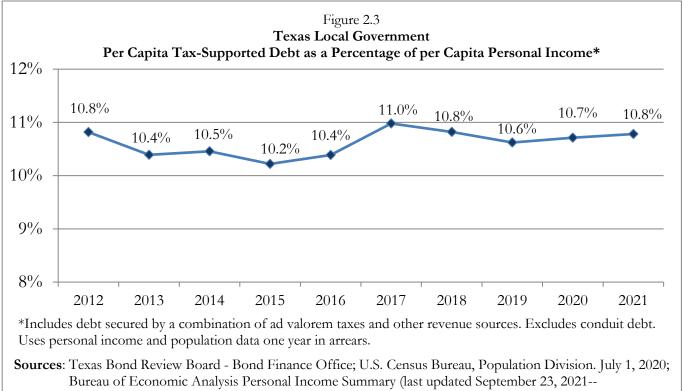

Local government tax-supported debt per capita increased over the past 10 years by 30.8 percent (or \$1,400 per person) from \$4,544 per capita in fiscal year 2012 to \$5,944 per capita in fiscal year 2021. Over this time, the state's population increased by an estimated 14.5 percent (3.7 million), based on July 2020 U.S. Census Bureau population estimates, which were released December 2020 (*Figure 2.2*).

Tax-Supported Debt as a Percentage of Personal Income

As reported by the U.S. Bureau of Economic Analysis, total personal income growth in Texas has grown 50.2 percent in the past 10 years, from \$1.08 trillion in 2011 to \$1.62 trillion in 2020 (the most recent data available). During the past five years, the growth was 24.8 percent, from \$1.30 trillion in 2017. Per capita personal income has shown a 31.2 percent 10-year growth from \$42,011 in 2011 and an 18.7 percent five-year growth from \$46,445 in 2017 to \$55,129 in 2020 (based on the most recent population and personal income totals available).

Per capita tax-supported debt, as a percentage of per capita personal income, has remained relatively constant during the past 10 years (*Figure 2.3*). Over the 10-year period, the growth of the state's personal income per capita has increased 0.4 percent more than the growth of tax-supported debt per capita, indicating personal income growth within Texas has kept pace with the state's local government tax-supported debt outstanding. Figure 2.3 below uses personal income and population data one year in arrears.

revised statistics for 1998-2020).

Tax-Supported Debt Issuance

New tax-supported debt issued during fiscal year 2021 totaled \$31.94 billion (\$17.75 billion in new money and \$14.18 billion in refunding debt). This is an increase of 15.3 percent from the total of \$27.69 billion issued in fiscal year 2020 and an increase of 42.7 percent from the total of \$22.39 billion issued in fiscal year 2017.

During this five-year period, School Districts have consistently issued the most tax-supported debt. For fiscal years 2017–2018 and 2020–2021, School Districts accounted for 50 percent or more of the total tax-supported debt issued. In fiscal year 2019, School Districts accounted for 49.9 percent of the total tax-supported debt issued. In fiscal year 2017, School Districts completed 418 GO issues for a total of \$13.61 billion (60.8 percent of the 2017 total), of which \$8.51 billion was new money debt and \$5.10 billion was refunding debt. In 2021, School Districts completed 455 GO issues for a total of \$17.79 billion (55.7 percent of the 2021 total), of which \$8.98 billion was new money debt and \$8.82 billion was refunding debt.

Tax-supported new money debt issuance over the past five years has risen from \$14.36 billion in 2017 to \$17.75 billion in 2021 (an increase of 23.6 percent).

Tax-supported refunding debt issuance over the past five years declined steadily from \$8.03 billion in 2017 to \$4.18 billion in 2019, before rising to \$14.18 billion in 2021, an overall increase of 76.7 percent.

Tax-supported debt issued over the past five fiscal years is shown below, excluding commercial paper and conduit debt (*Table 2.2*).

The amounts of Gross Cash Savings and Net Present Value Savings earned from tax-supported refunding issuance over the past five years have fluctuated from \$1.74 billion and \$1.14 billion, respectively, in 2017 to \$2.50 billion and \$2.05 billion, respectively, in 2021.

During that period, Texas local governments issued \$43.70 billion in tax-supported refunding debt to realize \$7.69 billion in Gross Cash Savings and \$5.89 billion in Net Present Value Savings.

Rate of Debt Retirement

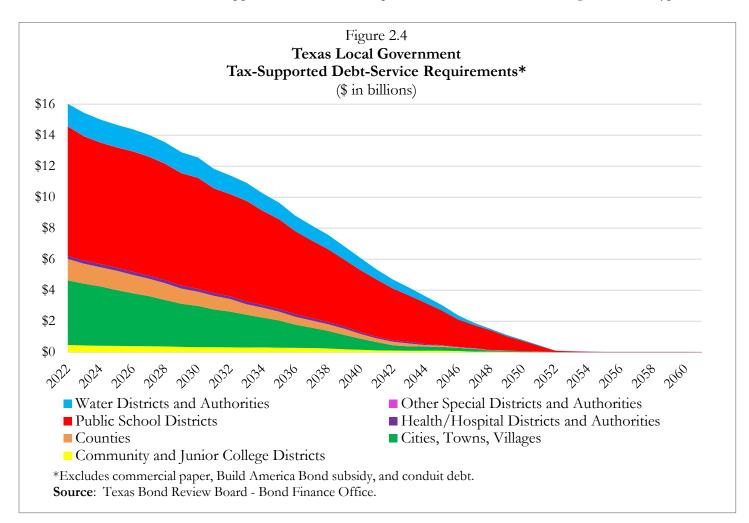

Timely repayment of debt is an important factor used by rating agencies to assess a municipal issuer's financial performance. As a guideline, rating agencies look for a repayment schedule that retires 25 percent of principal a quarter through the life of the debt and 50 percent halfway through the life of the debt. For debt outstanding as of fiscal year-end 2021, Texas local governments will repay 25.7 percent (\$44.54 billion) of tax-supported debt within five years, 50.6 percent (\$87.57 billion) within 10 years, and 88.1 percent (\$152.50 billion) within 20 years (*Table 2.3*). As of August 31, 2021, the final maturity for tax-supported debt was 40 years.

Tax-Supported Debt Service Outstanding

As of August 31, 2021, tax-supported debt-service requirements (principal and interest) projected over the life of the debt totaled \$249.43 billion, with all scheduled payments made by fiscal year 2061. *Figure 2.4* illustrates annual tax-supported debt-service requirements for each of the local government types.

Chapter 3 Texas Local Government Revenue Debt

Overview

Revenue debt includes debt legally secured by a specified revenue source(s). Most revenue debt does not require voter approval and usually has a maturity based on the life of the project to be financed.

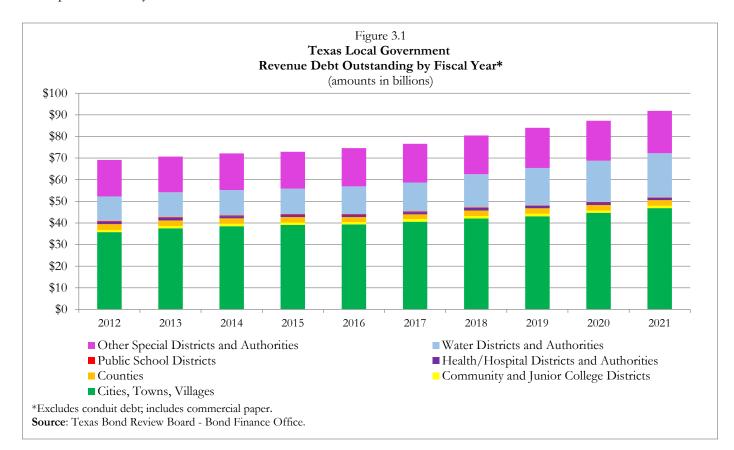

Excluding conduit debt, Texas local governments had \$91.85 billion in revenue debt outstanding as of fiscal year-end 2021, an increase of \$4.54 billion (5.2 percent) over the 2020 total of \$87.31 billion, and a 19.9 percent (\$15.22 billion) increase over the past five fiscal years, from \$76.63 billion in 2017 (*Table 3.1*).

Cities, Towns, Villages (Cities) accounted for 51.0 percent (\$46.88 billion) of the total revenue local debt outstanding, Water Districts and Authorities (WDs) accounted for 22.2 percent (\$20.43 billion), Other Special Districts (OSDs) accounted for 21.3 percent (\$19.59 billion) and the remaining 5.4 percent (\$4.95 billion) was attributable to Public School Districts, Community and Junior College Districts (CCDs), Counties, and Health and Hospital Districts and Authorities (HHDs).

Cities revenue debt increased by 15.5 percent from \$40.59 billion to \$46.88 billion in the five-year period. According to the U.S. Census Bureau, population growth in the state increased 5.2 percent (1.4 million) from 2016 to 2020 (most recent data available, released December 2020). Urban areas have experienced particularly rapid growth, creating the need for new infrastructure, including roads, bridges, and new and expanded water and sewer systems. The majority of Cities revenue debt has been used to finance general purpose needs, utility-related projects, including water, wastewater, and, in some localities, electric utility systems. Of the total Cities revenue debt outstanding, the Big 6 Cities (Houston, San Antonio, Dallas, Austin, Fort Worth, and El Paso, including revenue debt issued by the Dallas/Fort Worth International Airport) accounted for an average of 80.8 percent over the last five years and 82.1 percent over the last 10 years. Separately, WD revenue debt increased 52.5 percent from \$13.40 billion to \$20.43 billion in the five-year period, and Counties debt increased 20.2 percent from \$2.14 billion to \$2.58 billion during the same time period.

| *Includes commercial paper; excludes conduit debt. | | | | | | | | | |
| Source: Texas Bond Review Board - Bond Finance | Office. | | | | | | | | |

Over the past 10 fiscal years, revenue debt outstanding has increased \$22.72 billion (32.9 percent) from \$69.13 billion in 2012. *Figure 3.1* illustrates local revenue debt outstanding by category over the past 10 fiscal years.

Revenue Debt per Capita

Local government revenue debt per capita increased over the past 10 years by 16.1 percent (or \$433 per person) from \$2,696 per capita in fiscal year 2012 to \$3,128 per capita in fiscal year 2021. Over this time, the state's population increased by an estimated 14.5 percent (3.7 million), based on July 2020 U.S. Census Bureau population estimates, which were released December 2020 (*Figure 3.2*).

Revenue Debt Issuance

Excluding conduit debt, new revenue debt issued during fiscal year 2021 totaled \$15.50 billion (\$5.52 billion in new money and \$9.99 billion in refunding debt). This is an increase of 18.0 percent from the total of \$13.13 billion issued in fiscal year 2020 and an increase of 105.8 percent from the total of \$7.54 billion issued in fiscal year 2017.

During this five-year period, Cities have consistently issued the most revenue debt. In fiscal year 2017, Cities completed 86 issues for a total of \$4.22 billion (56.0 percent of the 2017 total), of which \$2.14 billion was new money debt and \$2.08 billion was refunding debt. In 2021, Cities completed 142 issues for a total of \$6.48 billion (41.8 percent of the 2021 total), of which \$2.53 billion was new money debt and \$3.95 billion was refunding debt. Cities revenue debt includes debt issued by the Dallas/Fort Worth International Airport.

Revenue debt issued over the past five fiscal years, excluding commercial paper and conduit debt, is shown in *Table 3.2* below.

Revenue new money debt issuance over the past five years has risen from \$4.08 billion in 2017 to \$5.52 billion in 2021. This is an increase of 35.4 percent.

Revenue refunding debt issuance reached a five-year low in 2017 at \$3.46 billion, while showing an overall increase of 188.7 percent for the five-year period from \$3.46 billion in 2017 to \$9.99 billion in 2021.

The amounts of Gross Cash Savings and Net Present Value Savings earned from revenue refunding issuance over the past five years have fluctuated from \$522.4 million and \$360.4 million, respectively, in 2017 to \$1.08 billion and \$971.5 million, respectively, in 2021.

During this period, Texas local governments issued \$32.46 billion in revenue refunding debt to realize \$4.98 billion in Gross Cash Savings and \$3.69 billion in Net Present Value Savings.

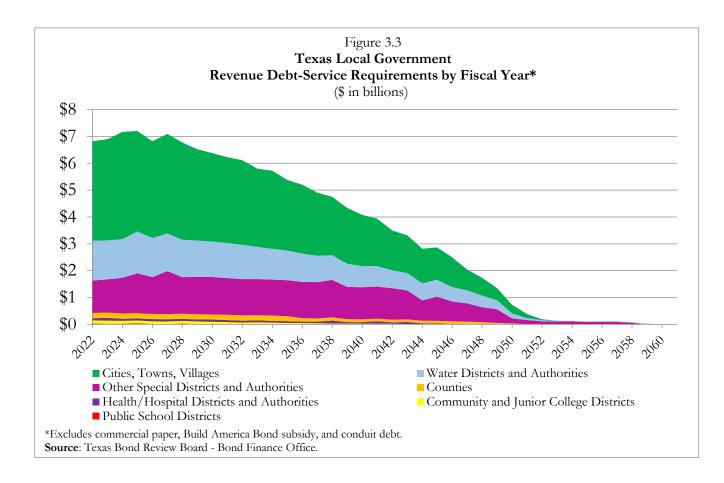

Rate of Revenue Debt Retirement

Timely repayment of debt is an important factor used by rating agencies to assess a municipal issuer's financial performance. As a guideline, rating agencies look for a repayment schedule that retires 25 percent of principal a quarter through the life of the debt and 50 percent halfway through the life of the debt. For debt outstanding as of fiscal year-end 2021, Texas local governments will repay 20.1 percent (\$18.23 billion) of revenue debt within five years, 41.8 percent (\$37.85 billion) within 10 years, and 79.5 percent (\$71.99 billion) within 20 years (*Table 3.3*). As of August 31, 2021, the final maturity for revenue debt was 40 years.

Revenue Debt Service Outstanding

As of August 31, 2021, scheduled revenue debt-service requirements (principal and interest) projected over the life of the debt totaled \$140.26 billion, with all scheduled payments made by fiscal year 2061. *Figure 3.3* illustrates the scheduled annual revenue debt-service requirements for each of the local government types.

Chapter 4 Capital Appreciation Bonds

Overview

Capital appreciation bonds (CABs) are sold at a discounted price called the par amount. They are often sold in combination with current interest bonds (CIBs). While the debt service for CIBs is paid throughout the life of the obligation, principal and interest on CABs is paid at maturity. Interest on CABs compounds semiannually and accumulates over the life of the bond, and the amount paid at the maturity is called the maturity value. Interest rates for CABs are generally higher than for CIBs, and CABs can be more expensive than CIBs because of the compounding interest. However, CABs can be an effective financing tool if they are used moderately and with reasonable terms.

Premium CABs (PCABs) provide a lower initial stated par amount and are sold with a premium. PCABs are issued to raise additional proceeds, preserve debt limits, and help local governments reach tax rate targets. Local governments issue more PCABs than non-premium CABs.

Over the past decade, total CAB maturity amounts outstanding have decreased by 45.2 percent from \$16.93 billion in fiscal year 2012 to \$9.27 billion in fiscal year 2021. Additionally, CAB maturity amounts outstanding have decreased 5.9 percent from \$9.85 billion outstanding in fiscal year 2020. The outstanding CAB maturities range from fiscal years 2022 to 2054.

Heavy use of CABs can result in rating agency downgrades.

CABs are often used to refund existing CAB and CIB debt.

CABs Issued

Table 4.1 shows that the total CAB par issued for Texas local governments during fiscal year 2021 was 0.3 percent (\$124.9 million) of the total CAB and CIB debt issued (\$47.44 billion). Public School Districts (School Districts) issuances accounted for 95.1 percent (\$118.7 million) of the total CABs issued for local governments during fiscal year 2021. Of the total par issued by School Districts, 0.7 percent was issued as CAB par. CABs have been used by School Districts to enable them to remain under the 50-cent debt ceiling that limits the property taxes assessed for debt service costs to 50 cents per \$100 of assessed value. CAB issuances by School Districts are general obligation (tax) debt repaid with ad valorem taxes.

For CAB debt previously issued and outstanding in fiscal year 2021, Texas local governments will owe \$5.32 in interest and principal for every \$1 of principal borrowed.

The 84th Legislature (2015) passed House Bill 114, effective September 1, 2015, which prohibits Texas local governments from issuing CABs secured by property taxes with terms of more than 20 years and (with some exceptions) from refunding CABs to extend their maturity dates. It also limits each government's CAB debt to no more than 25 percent of its total outstanding bond debt, including principal and interest. The 85th Legislature (2017) passed Senate Bill 295, which extends the allowed maturity date for CABs issued for refunding purposes and financing transportation projects.

Three ratios have been developed to compare CAB issuances. The first is the "Maturity Value/Par" ratio, which is calculated by dividing the CAB maturity amount by the CAB par amount and represents the total amount to be repaid (principal plus interest) compared to the par amount borrowed. This ratio disregards premiums received on PCABs.

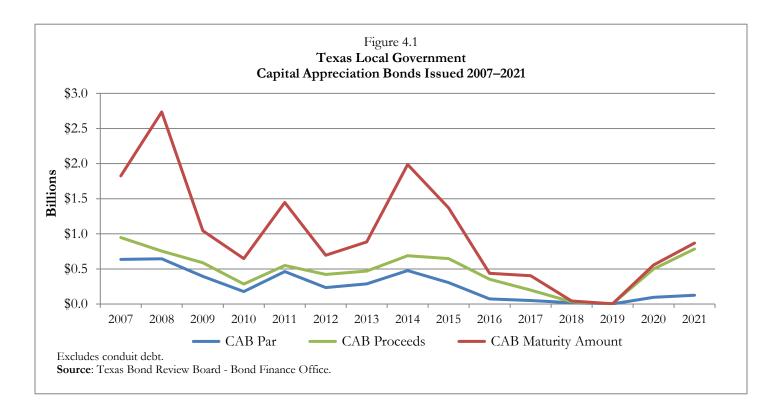

The second is the "Maturity Value/Proceeds" ratio, which is calculated by dividing the CAB maturity amount by the total CAB proceeds, including the additional proceeds received as premium on PCAB issuances. This ratio represents the total amount to be repaid at maturity (principal plus interest) compared to the total amount of proceeds received (par plus premium).

The third is the "Accreted Interest/Proceeds" ratio (AIPR), which is calculated by dividing the CAB maturity amount minus the original par amount by the total proceeds including the CAB premium. This ratio represents the total amount of interest to be paid at maturity compared to the total amount of proceeds received including premium (par plus premium).

Table 4.3 lists the top 20 most expensive CABs issued and outstanding as of fiscal year-end 2021 as defined by the "Maturity Value/Proceeds" ratio. CABs become increasingly more expensive as interest continues to compound with longer term maturities. For comparison, the Maturity Value/Proceeds ratio for CIBs is generally less than 2.0 and the AIPR is generally less than 1.0. The decline in the Maturity Value/Proceeds ratio compared to the Maturity Value/Par ratio shows the effect of including the premiums on PCABs in the comparison. When the Maturity Value/Proceeds ratio equals the Maturity Value/Par ratio, this means the CAB was sold at par without generating a premium.

Figure 4.1 illustrates the total CAB par amount issued, the total proceeds received (including premiums on PCABs), and CAB maturity amounts (total debt-service owed at maturity) since 2007.

CABs Outstanding

`

Table 4.4 provides a comparison between the total CAB debt outstanding and total CIB and CAB debt outstanding for each type of local government entity. The CAB maturity amount outstanding (principal plus interest) is 2.4 percent (\$9.27 billion) of total debt-service owed by local governments. School Districts owe the most CAB debt service at 48.6 percent of total CAB debt-service owed among all local governments. While CAB par was 0.7 percent of total CIB and CAB par outstanding at fiscal year-end 2021, CAB interest accounted for 6.0 percent of total interest owed.

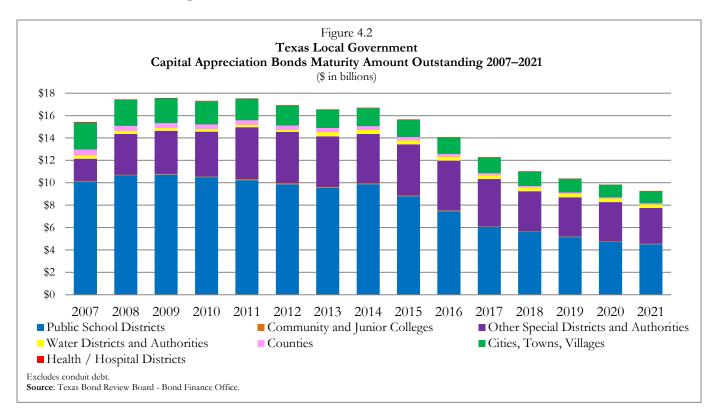

Figure 4.2 below shows the maturity amount (principal plus interest) for each local government entity with CABs outstanding since 2007.

Figure 4.3 shows CIB debt service and CAB debt service for all local governments since 2007. In fiscal year 2021, CAB maturity amounts accounted for 2.4 percent (\$9.27 billion) of the total debt service outstanding.

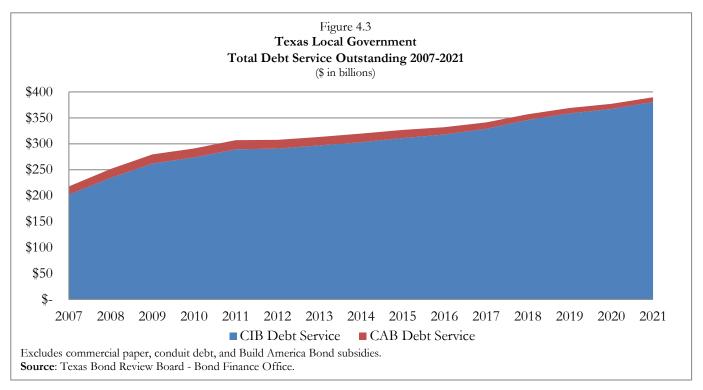

Figure 4.4 compares the ratio of total debt service to total par outstanding for CIB and CAB debt for all local governments. On average, issuers of CAB debt paid \$3.69 in principal and interest for every \$1 of principal borrowed since 2007 compared to \$1.62 for CIB debt.

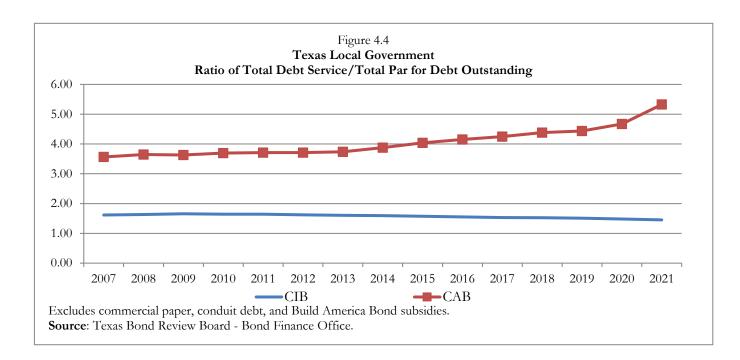

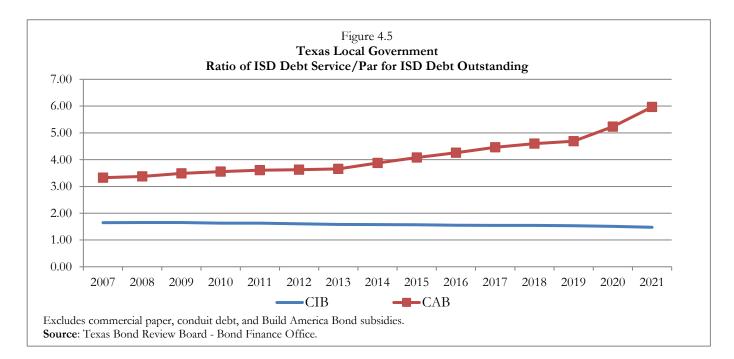

Figure 4.5 compares the ratio of School District debt service to ISD debt outstanding for CIB and CAB debt. On average, School Districts paid \$4.12 in principal and interest for every \$1 of principal borrowed since 2007 for CAB debt compared to \$1.58 for CIB debt.

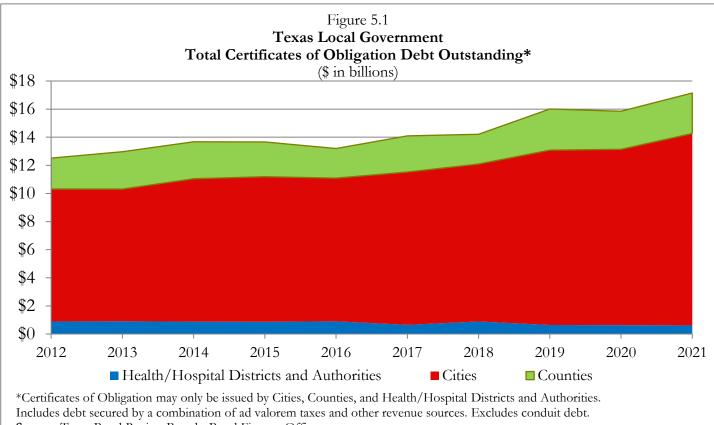

THIS PAGE INTENTIONALLY LEFT BLANK

Certificates of Obligation (COs) are authorized by the Certificate of Obligation Act of 1971, Subchapter C of Chapter 271 of the Texas Local Government Code. COs are generally issued as taxsupported debt to pay for: the construction of a public work; the purchase of materials, supplies, equipment, machinery, buildings, land, and rights-of-way; and professional services, such as engineers, architects, attorneys, and financial advisors. Debt for COs is paid from ad valorem taxes and/or a combination of revenues available from other sources. CO issuance does not require voter approval unless a valid petition of 5 percent of the voters requesting an election is presented.

With the passage of House Bill 1378 during the 84th Legislative Session (2015), effective January 1, 2016, a CO may not be issued if the voters rejected a bond proposition for the same purpose within the preceding three years, except in the case of public calamity, public health, or unforeseen damage to public property, or to comply with a state or federal regulation. House Bill 477 passed during the 86th Legislative Session (2019), effective September 1, 2019, added additional requirements for the publishing of notices of intention to issue a CO prior to the date the issuer proposes to pass an order or ordinance authorizing the issuance of a CO. Only Counties, certain Cities, Towns, Villages, (Cities), and Health and Hospital Districts and Authorities (HHDs) are authorized to issue COs.

Since fiscal year 2012, CO debt outstanding has increased by 37.0 percent (\$4.63 billion) from \$12.51 billion outstanding in fiscal year 2012 to \$17.15 billion outstanding in fiscal year 2021. Cities accounted for 79.6 percent of the total CO debt outstanding at fiscal year-end 2021 (*Figure 5.1*).

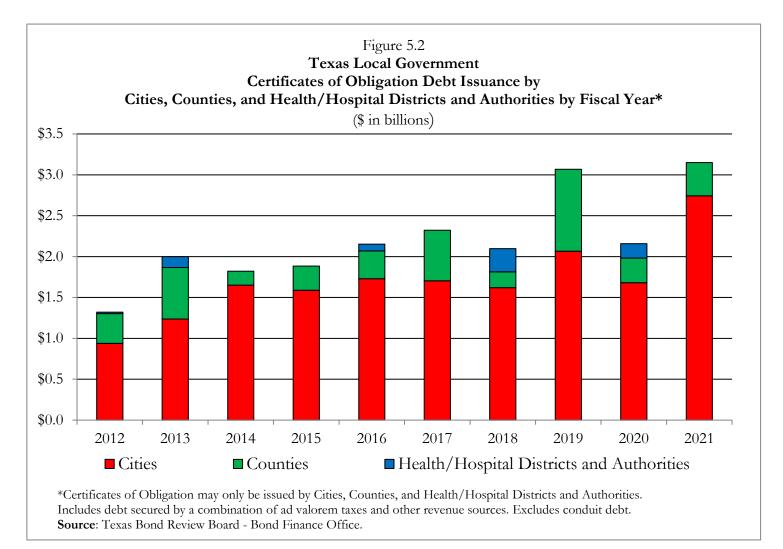

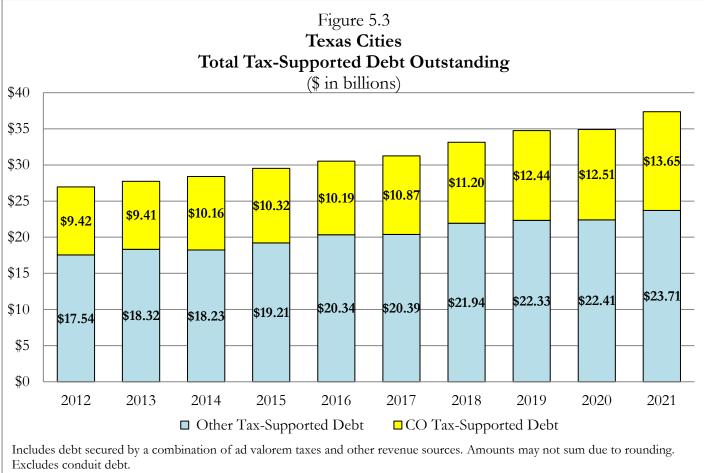

Figure 5.2 illustrates the relative amounts of CO debt issued by Cities, Counties, and HHDs over the past 10 fiscal years.

The 20 highest issuers of CO debt accounted for 38.9 percent of all CO debt outstanding (Table 5.1).

Cities, Towns, Villages

Over the past 10 fiscal years, tax-supported CO debt outstanding has increased by 44.9 percent (\$4.23 billion) from \$9.42 billion to \$13.65 billion. As of fiscal year 2021, outstanding tax-supported CO debt represents 36.5 percent of the total Cities tax-supported debt outstanding and 16.2 percent of the total Cities debt outstanding, including revenue debt. *Figure 5.3* illustrates the portion of total Cities tax-supported debt attributable to COs. As of fiscal year 2021, 671 Cities had tax-supported CO debt outstanding.

Counties

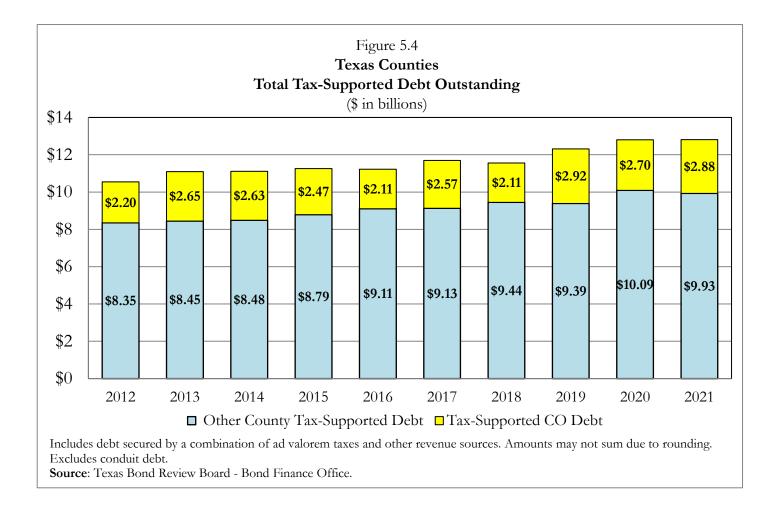

As of August 31, 2021, Texas Counties had \$2.88 billion of CO debt outstanding. Of the Counties with CO debt outstanding, their CO debt accounted for 36.1 percent of their total tax-supported debt outstanding. Of the 86 Counties with CO debt outstanding, the top 20 had \$2.42 billion (84.3 percent) of the total Counties CO debt outstanding (*Table 5.4*).

Figure 5.5 shows HHD CO debt outstanding relative to total tax-supported HHD debt outstanding. During the 10-year period, HHD CO debt outstanding decreased 32.0 percent from \$894.7 million in 2012 to \$608.0 million in 2021.

Bond elections are required before the issuance of certain debt obligations that pledge unlimited or limited ad valorem taxes of a local government for repayment. Bond elections are generally held on a uniform election date. Section 41.001 of the Election Code states a uniform election date is one of the following: the first Saturday in May in an odd numbered year; the first Saturday in May in an even numbered year (excluding counties); or the first Tuesday after the first Monday in November.

Texas local governments are not required to provide the Texas Bond Review Board (BRB) with bond election information. Such information has been obtained from various sources, including newspaper articles, the Municipal Advisory Council's *Texas Bond Reporter*, official statements, and the U.S. Department of Justice.

Table A.1 shows the number of voter-approved bond elections for the past five fiscal years. During fiscal year 2021, a total of 151 local governments held 311 bond elections approving the potential issuance of \$18.50 billion of additional debt. Approximately 28 local governments cancelled 65 elections during the Nov 3, 2020, elections.

Separately, on November 2, 2021, 91 local governments held 174 bond elections, with 61 local governments approving 109 bond elections totaling \$8.31 billion.

Appendix B Texas Local Government Conduit Debt

Conduit, component, and related organization debt has been excluded from this report, except for data presented in this appendix and certain data presented in *Appendix F, Commercial Paper*. A conduit issuer is usually a government agency or a creation of the agency (such as a nonprofit corporation sponsored by a local government) that issues municipal securities to finance revenue-generating projects. The funds generated are generally used by a third party (known as the "conduit borrower" or "obligor"), and it is generally the responsibility of the obligor to make debt-service payments.

Most conduit debt is issued for projects that benefit the public or segments of the public within the geographical area of the sponsoring agency. Some conduit issuers can issue debt for projects that benefit the Texas public at large. The purposes and locations of projects funded by conduit debt are governed by the Texas law used to establish the conduit issuer. The projects include transportation, airports, ports, housing, utilities, culture, higher education, recreation, and health, as well as industrial and economic development.

Not all Texas local government conduit issuers are required to provide issuance information to the Texas Bond Review Board (BRB) pursuant to Texas Government Code, Chapter 1202.008. However, basic information on all conduit issuances that require approval by the Office of the Attorney General (OAG) is forwarded by the OAG to the BRB. In prior years, this data was retained but not included in the BRB Debt Database. Beginning in fiscal year 2017, the BRB has added current conduit issuances into the database. There is an ongoing BRB project to enter conduit issuance data from prior years into the database as well. At the end of this project, all conduit debt outstanding from 2003 onwards will be included, based on data provided to the BRB in those years.

Conduit Debt Issuance

Currently, only fiscal years 2017 through 2021 have conduit debt issuance information available (*Table B.1*). Conduit debt outstanding and debt service outstanding information will be reported once the BRB conduit project has been completed.

In fiscal year 2021, 72 local government conduits issued 174 new debt instruments for a total of \$7.11 billion, an increase of 16.7 percent from the \$6.09 billion issued in fiscal year 2020. New money debt issuance increased 28.3 percent (from \$3.86 billion in 2020 to \$4.95 billion in 2021) and refunding debt issuance decreased 3.4 percent (from \$2.24 billion in 2020 to \$2.16 billion in 2021).

Since fiscal year 2017, total conduit issuance increased \$2.54 billion (55.5 percent) from \$4.57 billion, new money debt issuance increased \$2.50 billion (101.8 percent) from \$2.45 billion, and refunding debt issuance increased \$39.7 million (1.9 percent), from \$2.12 billion.

Conduit debt is generally backed by revenue. All conduit debt issued in the past five years was revenue debt, except for \$83.5 million of toll road combination tax/revenue new money bonds issued in 2017, \$25.0 million of toll road combination tax/revenue refunding bonds issued in 2020, and \$34.4 million of toll road combination tax/revenue new money bonds issued in 2021.

Conduit entities also issue commercial paper. Commercial paper outstanding balances reported by conduits over the past 10 years are presented at the end of *Appendix F, Commercial Paper*.

Table B.1 shows conduit debt issuance by local government conduit types with a new money/refunding breakdown.

Cities conduit entities issued \$3.86 billion in debt in fiscal year 2021, 54.3 percent of the total 2021 conduit debt issued; \$2.44 billion was new money debt, and \$1.43 billion was refunding debt. Such revenue debt is often issued as a loan to third parties to finance the acquisition of land, and to construct or expand, furnish, and equip certain cultural, educational, housing, health-related, or correctional facilities.

Counties conduit entities can issue revenue and lease-revenue debt. Some can issue tax-supported debt. Historically, Counties conduit revenue debt has been issued for pollution control and residential rental projects. Many Counties conduit lease-revenue obligations are issued by nonprofit corporations formed by Counties to finance the acquisition of land and to construct or expand, furnish, and equip county projects, including adult or juvenile correctional facilities that may house county, state, or federal prisoners. In fiscal year 2021, Counties issued \$1.79 billion in conduit debt, 25.2 percent of the total issued in 2021; \$1.21 billion was revenue new money debt, and \$584.1 million was revenue refunding debt. Included in the new money debt amount is \$34.4 million issued by Fort Bend Grand Parkway Toll Road Authority, supported by a combination of tax and revenue.

Other Special Districts and Authorities issued \$852.0 million in conduit debt in fiscal year 2021, 12.0 percent of the total fiscal year 2021 conduit debt issuance; \$847.8 million was new money debt, and \$4.2 million was refunding debt.

Many Water Districts and Authorities (WDs) create conduit issuers to raise funds for pollution and solid waste disposal facilities. In fiscal year 2021, WDs issued \$558.3 million in conduit debt, 7.9 percent of the total fiscal year 2021 conduit debt issuance; \$459.6 million was new money debt and \$98.7 million was refunding debt.

Community and Junior College Districts (CCDs) can execute lease-purchase agreements that provide security for lease-revenue obligations issued by nonprofit corporations formed by CCDs. In fiscal year 2021, CCDs issued \$47.6 million in conduit debt, all refunding debt, which comprised 0.7 percent of the total fiscal year 2021 conduit debt issued.

No conduit debt was issued in fiscal year 2021 by Health/Hospital Districts and Authorities (HHDs). (HHD conduit debt was last issued in 1985 and matured in 2011.)

The conduit debt issued by Public School Districts (School Districts) is not included in this appendix. School Districts create Public Facility Corporations (PFCs) to issue debt on behalf of the school districts. The BRB has historically included this PFC debt as lease-purchase revenue debt of the school district, and this revenue debt is included in the total debt outstanding of School Districts in Chapter 1 of this report.

THIS PAGE INTENTIONALLY LEFT BLANK

History

Local government education finance corporations (EFCs) issue the majority of charter school debt in Texas. These conduit corporations are created by Texas municipalities to issue debt on behalf of charter school borrowers. Debt issued by EFCs is secured by the revenues of the borrower and is not an obligation of the municipality. (Because debt issued by local government EFCs is not reported to the Texas Bond Review Board (BRB), staff relied on multiple sources to compile the data used in this Appendix.)

Public charter schools were authorized by the legislature in 1995 to offer publicly funded alternate education options to parents within the public school system. The Texas Education Code, Chapter 12, provides for four types of charter schools: home-rule charters, campus or district charters, openenrollment charters, and university charters. Most charters in Texas are open enrollment.

Open-enrollment charter schools function like public school districts in that they provide tuitionfree instruction and must accept any student that applies, subject to enrollment constraints. Charter schools have no taxing authority and receive most of their funding from the state based on their enrollment. Charter schools are subject to fewer restrictions than public schools, but they must meet certain requirements for financial, governing, and operating standards adopted by the Texas Commissioner of Education (Commissioner). State law requires fiscal and academic accountability for charter schools, and the state monitors and accredits charter schools in the same manner as public school districts.

Pursuant to Texas Education Code, Section 53.351, the Texas Public Finance Authority (TPFA) established the Texas Public Finance Authority Charter School Finance Corporation (Corporation) to act as a conduit to facilitate the issuance of revenue bonds for the acquisition, construction, repair, or renovation of educational facilities for authorized open-enrollment charter schools. All issuances of charter school debt issued by the Corporation must be approved by the BRB.

Permanent School Fund Bond Guarantee Program

In 1854, the 5th Legislature created the Texas Permanent School Fund (PSF) expressly for the benefit of public schools. In addition, the Constitution of 1876 stipulated that certain lands and proceeds from the sale of those lands would also be dedicated to the PSF. The Constitution requires that distributions from the returns on the PSF be made to the Available School Fund to be used for the benefit of public schools, and it allows the PSF to be used to guarantee bonds issued by public schools.

The PSF Bond Guarantee Program (BGP) was created in 1983 as an alternative for school districts to avoid the cost of private bond insurance by obtaining a PSF guarantee for voter-approved public school bond issuances.

The Texas Education Agency (TEA) reviews each BGP applicant for financial soundness, accreditation status, and complaints from the public regarding misconduct and rules violations. Applicants for the BGP must have an investment grade rating below triple-A from at least one of the top credit rating agencies. Bonds guaranteed by the BGP are rated AAA from all three credit rating agencies.

Texas Education Code, Section 12.135, passed by the 82nd Legislature (2011), permits charter schools to participate in the BGP, but they must apply and be approved by the Commissioner to participate in the program. In January 2014, the State Board of Education adopted rules for charter school participation in the BGP, and the program was opened to them in March 2014.

The BGP capacity for all schools is currently set at the lower of a multiple of 3.50 times the PSF book value or the Internal Revenue Service-set limitation of \$117.3 billion, minus a 5 percent reserve. The State Board of Education has also required an additional 5 percent of charter capacity to be set aside as a reserve. Prior to fiscal year 2018, the capacity for charter schools was calculated using the available PSF capacity multiplied by the ratio of the number of charter school students to public school students determined annually by the Commissioner (currently set at 6.15 percent), applied against the available capacity of the BGP. The available capacity is defined as maximum allowable for guarantee, less total amount of outstanding guaranteed bonds, and less the State Board of Education-established reserve on the total program. Effective September 1, 2017, the 85th Legislature (2015) amended the Educational Code, Section 45.0532, related to the calculation of the capacity of the bond guarantee program, through Senate Bill 1480 (SB 1480). SB 1480 changes the charter capacity calculation formula to apply the ratio of charter students described above directly against the maximum allowable overall program guarantee net of the 5 percent reserve on the total program. This methodology was designed to be fully phased in over five years.

Charter School Closures

Senate Bill 2 passed in the 83rd Legislature (2013) requires the mandatory revocation of a charter by the Commissioner if a charter school fails to meet academic or financial accountability performance ratings for the preceding three school years. As a result of this legislation, 22 charter school revocations have occurred between 2014 and 2021.

As of October 31, 2021, a total of \$5.95 billion of debt had been issued for charter schools by EFCs and other higher education authorities, of which an estimated \$4.71 billion is currently outstanding. *Table C.1* shows total higher education authority and EFC issuances since the inception of the BGP.

Of the \$4.71 billion of charter school debt outstanding as of October 31, 2021, an estimated \$3.35 billion was guaranteed by the PSF. *Table C.2* shows charter school debt guaranteed by the PSF.

For fiscal year 2021, the total aggregated cost of issuance (COI), including underwriter's spread for both competitive and negotiated bond sales among Texas local government debt issuers, was \$646.8 million. It was comprised of total direct bond costs of \$408.5 million and total underwriter's spread of \$238.2 million (*Table D.1*).

The largest components of total direct bond costs are fees for financial advisor, bond counsel, and rating agencies, which totaled \$130.3 million, \$120.8 million, and \$42.7 million, respectively. Other direct bond related costs were \$114.7 million and include fees for bond insurance, disclosure counsel, paying agent, trustee and escrow verification, miscellaneous bond program fees, attorney general fees, and various smaller fees.

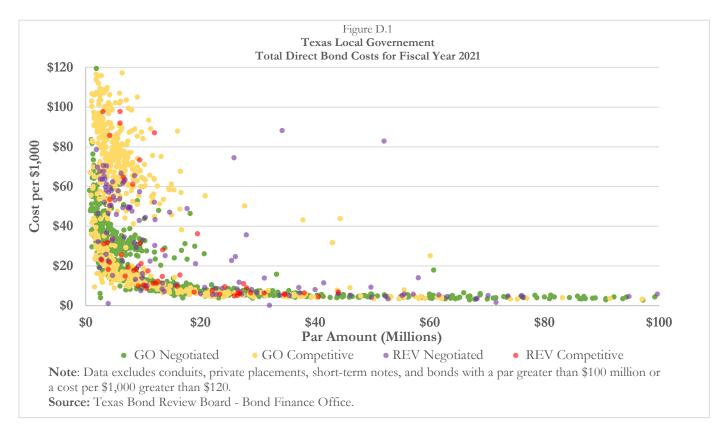

Total underwriter's spread is comprised of the takedown fee, management fee, underwriter's counsel fee, and spread expenses fee, which totaled \$183.1 million, \$22.2 million, \$18.8 million, and \$14.1 million, respectively.

Trends in Issuance Costs for Texas Local Government Bonds in 2021

Total direct bond costs include all cost of issuance fees except the underwriter's spread. To analyze these fees on a cost per \$1,000 basis for fiscal year 2021, each major cost of issuance component has been compared by bond type (general obligation vs. revenue) and by method of sale (negotiated vs. competitive) (*Figures D.1, D.2, D.3, D.4,* and *D.5*).

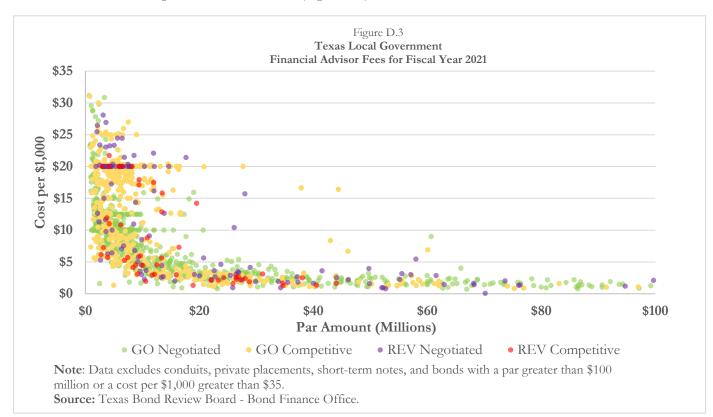

Excluding issuances of conduit debt, private placement debt, and short-term notes, data was collected from 1,582 transactions for fiscal year 2021 of which 656 were competitive and 926 were negotiated. Of the competitive transactions, 600 were general obligation and 56 were revenue issuances. Of the negotiated transactions, 776 were general obligation and 150 were revenue transactions. The data indicates that cost per \$1,000 for all transactions declined as transaction size increased. General obligation (GO) competitive transactions had the highest cost per \$1,000 for transactions less than \$50.0 million — 570 of the 600 GO competitive transactions were issued for less than \$50.0 million in fiscal year 2021. Generally speaking, cost per \$1,000 decreased as transaction size increased. GO negotiated and GO competitive transactions mostly had lower cost per \$1,000 for transaction sizes over \$20.0 million (*Figure D.1*).

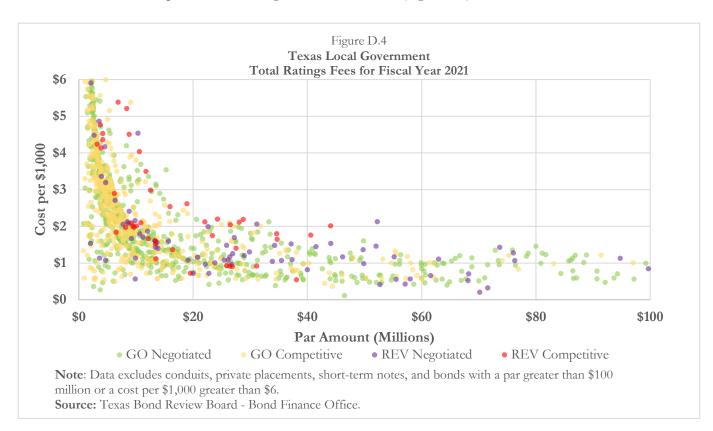

Data for bond counsel cost per \$1,000 for fiscal year 2021 indicates that GO competitive transactions had the highest cost per \$1,000 for smaller transaction sizes. GO negotiated transactions generally had the lowest cost per \$1,000 for transaction sizes larger than \$50.0 million (*Figure D.2*).

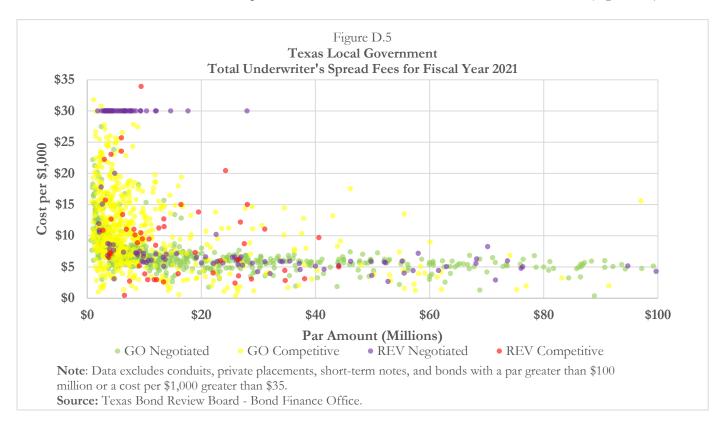

Data for financial advisor cost per \$1,000 indicates that GO competitive transactions had the highest cost per \$1,000 for smaller transaction sizes. GO competitive had the highest cost per \$1,000 for transaction sizes larger than \$50.0 million (*Figure D.3*).

Data for total ratings cost per \$1,000 indicates that GO negotiated transactions had the lowest cost per \$1,000 for smaller transaction sizes. Both revenue negotiated and revenue competitive transactions had the lowest cost per \$1,000 for larger transaction sizes (*Figure D.4*).

Data for total underwriter's spread cost per \$1,000 indicates that GO competitive and revenue negotiated transactions had the highest cost per \$1,000 for smaller transaction sizes. GO negotiated transactions had the lowest cost per \$1,000 for transaction sizes less than \$50.0 million (*Figure D.5*).

2021 Local Texas Governments Cost of Issuance Statistical Information

Table D.2 provides COI statistical information for GO and revenue transactions completed during fiscal year 2021.

The weighted average for total COI, including underwriter's spread, increased to \$15.20 per \$1,000 in 2021 from \$14.88 per \$1,000 in 2020. The average transaction size decreased slightly to \$27.0 million in 2021 from \$27.6 million in 2020 and the average fee increased slightly to \$410,603 from \$410,532 in 2020, respectively.

Appendix E Build America Bonds

Build America Bonds (BAB) were created by the American Recovery and Reinvestment Act of 2010 and issued as Tax Credit BABs or Direct-Payment BABs. Tax Credit BABs provide a tax credit subsidy to investors equal to 35 percent of the interest payable by the issuer. Direct-Payment BABs provide a direct federal subsidy payment to state and local governmental issuers equal to 35 percent of the interest payable. Authority to issue BABs expired in December 2010.

Under the Budget Control Act of 2011, across-the-board sequestration took effect on March 1, 2013, and direct-pay bonds such as BABs experienced an 8.7 percent reduction of the original 35 percent federal subsidy on BABs interest payments. The Internal Revenue Service reported that, effective October 1, 2014, issuers of BABs and other direct-pay bonds would have their subsidy payments processed in federal fiscal year 2014 reduced by 7.2 percent, and in federal fiscal year 2015 reduced by 7.3 percent. In federal fiscal years 2016, 2017, 2018, 2019, and 2020 the subsidy payments were further reduced by 6.8 percent, 6.9 percent, 6.6 percent, 6.2 percent, and 5.9 percent, respectively. In federal fiscal years 2021 and 2022, the subsidy payments are reduced by 5.7 percent.

Based on data reported to the BRB at the time of issuance, during fiscal years 2009–2011, 62 local government issuers issued \$10.92 billion in Direct-Payment BABs. Of that amount, \$10.19 billion was issued for new-money purposes, and \$728.5 million was issued for refunding purposes. Local governments in Texas accounted for approximately 5.8 percent of the total national BAB issuance of \$181.26 billion. As of August 31, 2021, BAB debt outstanding was \$5.73 billion or 2.2 percent of total local debt outstanding (*Table E.1*).

Appendix F Commercial Paper

Commercial paper (CP) is an unsecured debt instrument that matures within 270 days and is backed by a liquidity provider, usually a bank, that stands by to provide liquidity in the event CP notes are not remarketed or redeemed at maturity. Debt that matures in less than 270 days does not require registration with the SEC, so it is less costly to the issuer. Since CP is not backed by collateral, only issuers with solid ratings from the major credit rating agencies are able to offer their CP at reasonable prices. CP generally carries lower interest repayment rates than bonds due to the shorter maturities of CP.

Local governments and their conduit corporations issue CP to provide interim financing for projects for which revenues are not yet available. Texas local governments are not required to provide the Texas Bond Review Board (BRB) with CP issuance information but are required to report new CP programs to the Office of the Attorney General, which forwards such information to the BRB. Current CP balances are obtained by contacting local governments who have had CP programs in prior years or who have opened new CP programs in 2021. Because some local governments reported in the past that they terminated or inactivated their CP programs in favor of various revolving credit, direct purchase agreements, or lines of credit with banking institutions, the BRB has asked all CP contacts to report such non-public debt outstanding along with their CP outstanding balances, starting in 2017. CP data provided in this Appendix includes any reported non-public debt outstanding.

Non-conduit CP can be supported by pledges of tax or revenue. The 2021 reported non-conduit CP total of \$2.63 billion showed a 10-year increase of 35.7 percent from \$1.94 billion in 2012, a five-year increase of 83.1 percent from \$1.44 billion in 2017, and a 1.4 percent decrease from the 2020 total of \$2.67 billion (*Figure F.1*).

Local government CP outstanding is shown by pledge type for each of the last five fiscal years in *Table F.1*.

*Includes issuer-reported non-public debt; excludes conduit debt. **Source**: Texas Bond Review Board - Bond Finance Office. As of 2021 fiscal year-end, nine Cities reported CP and/or non-public debt authorized, with seven reporting CP outstanding. Of the Counties, only one reported both authorized and outstanding CP. Of the six Public School Districts (School Districts) reporting CP authorized, two reported CP outstanding. Eight Water Districts and Authorities (WDs) reported CP authorized; three of those districts reported CP outstanding. Four Other Special Districts and Authorities (OSDs) reported CP authorized; three of those districts reported CP outstanding. No Community/Junior College Districts (CCDs) or Health/Hospital Districts and Authorities (HHDs) reported authorized or outstanding balances as of year-end.

Additionally, of the five Cities Conduit issuers reporting CP authorized, four reported CP outstanding, and one WD Conduit issuer reported both authorized and outstanding CP.

Figure F.2 shows the difference between the total amount of non-conduit authorized CP and the reported outstanding balances for each government type as of 2021 fiscal year-end.

Of the Big 6 Cities (Austin, Dallas, El Paso, Fort Worth, Houston, and San Antonio), five had outstanding non-conduit CP balances as of August 31, 2021. The Big 6 Cities CP outstanding accounted for 88.9 percent of the total Cities CP outstanding in 2017, 94.9 percent in 2018, 86.3 percent in 2019, 92.9 percent in 2020, and 69.9 percent in 2021.

Table F.2 shows outstanding CP balances for the Big 6 Cities over the past five years.

*Does not reflect total authorization amount; includes issuer-reported non-public debt; excludes conduit CP. **Source**: Texas Bond Review Board - Bond Finance Office.

As conduit issuers generally have no taxing authority, most conduit issued CP is revenue supported. The fiscal year 2021 reported conduit CP total of \$1.04 billion showed a 10-year increase of 47.2 percent from \$706.6 million in 2012, a five-year increase of 82.2 percent from 570.9 million in 2017, and an increase of 42.9 percent from the 2020 total of \$727.8 million (*Figure F.3*).

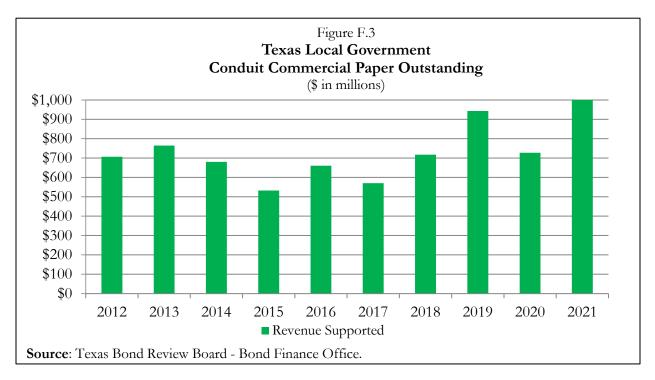

Table F.3 shows the issuers of conduit CP outstanding over the past five years.

THIS PAGE INTENTIONALLY LEFT BLANK

Appendix G Overview of Texas Local Governments with Debt Outstanding

Debt outstanding totals shown in this Appendix and in the annual report include commercial paper issued by local governments but do not include debt issued by conduit entities created by local governments. See *Appendix B, Texas Local Government Conduit Debt*, for conduit debt information.

Texas Community and Junior College Districts

Community and Junior College Districts (CCDs) are two-year institutions that primarily serve local taxing jurisdictions and offer vocational, technical, and academic courses for certifications or associates degrees. CCDs are governed under the Texas Education Code, Chapter 130. As of August 31, 2021, total CCD debt outstanding was 2.3 percent (\$6.02 billion) of total local debt outstanding.

CCDs issue both tax-supported and revenue debt. Proceeds from CCD debt issuances are used to construct, equip, renovate, expand, and improve facilities, acquire information technology equipment, and refund outstanding debt. Debt service is paid from either an ad valorem tax or various revenue streams such as tuition, technology, and miscellaneous fees or lease revenue. Additionally, CCDs create nonprofit conduit entities to issue debt on behalf of, and for projects to benefit, the CCDs. Most of CCD new obligations are authorized under Chapters 45 and 130 of the Texas Education Code.

Texas Cities, Towns, Villages

Texas Cities, Towns, Villages (Cities) issue both tax-supported and revenue debt. Revenue debt also includes sales tax and lease-revenue obligations. As of August 31, 2021, total cities debt outstanding was 31.6 percent (\$84.24 billion) of total local debt outstanding.

Tax-supported debt financing is used for authorized municipal purposes, such as the acquisition of vehicles, road maintenance equipment, road construction, and maintenance materials; construction of road and bridge improvements; maintaining public safety (police, fire, and EMS); renovation, equipping, and construction of municipal buildings and utility systems; acquisition of real property; and acquisition of computer equipment and software. Most of Cities new ad valorem tax debt is authorized under Chapters 1331 and 1502 of the Government Code and Chapter 271 of the Local Government Code.

Revenue debt financing is used for such purposes as acquiring, constructing, enlarging, remodeling, and renovating authorized municipal systems and infrastructure, such as wastewater and sewer systems, toll roads, and airports.

Cities also issue debt that is supported by a combination of tax and revenue for similar purposes listed above. Such debt is categorized as tax-supported.

Sales tax revenue debt is issued by certain Cities for such purposes as constructing and improving municipal parks and recreation facilities/entertainment centers as well as hike and bike trails.

Cities can form nonprofit conduit entities to issue debt for the benefit of the Cities and to finance the acquisition of land and construction of certain prisons. Pursuant to Texas Government Code, Chapter

1202.008, the BRB does not receive issuance information for all lease-revenue obligations or conduit issuances. Reported data only reflects the amount of debt issued for certain municipalities.

Texas Counties

Counties issue two types of debt, tax supported and revenue, which also includes lease-revenue. As of August 31, 2021, county debt was 5.8 percent (\$15.39 billion) of total local debt outstanding.

Tax-supported debt is used for authorized county purposes such as the acquisition of vehicles, road maintenance equipment, road construction, and maintenance materials; construction of road and bridge improvements; renovation, equipping, and construction of county buildings and jails; acquisition of real property; and acquisition of computer equipment and software. Most of Counties new ad valorem tax debt is authorized under Chapters 1301 and 1473 of the Government Code and Chapter 271 of the Local Government Code.

Revenue debt is used for authorized county purposes such as acquiring, constructing, enlarging, remodeling, and renovating wastewater and sewer systems, toll roads, and hospitals.

Counties create nonprofit conduit entities to issue debt for projects that benefit Counties.

Texas Health/Hospital Districts and Authorities

Health/Hospital Districts and Authorities (HHDs) provide a legal framework to create hospital systems to provide hospital and medical care facilities, emergency services, and mental health services to district residents. As of August 31, 2021, HHD debt outstanding was 1.3 percent (\$3.51 billion) of total local debt outstanding.

HHD tax-supported and revenue debt is used to construct, acquire, and/or improve buildings for hospital, fire, emergency, and mental health facilities. HHDs can create conduit entities to issue debt on their behalf.

The BRB collects debt information on four types of hospital, health, and public safety districts: hospital districts (HD), hospital authorities (HA), emergency services districts (ESD), and mental health mental retardation centers (MHMR). They are described as follows:

| District | Purpose | Voter Approved /Taxing Authority | Authorizing Texas Health and Safety Code Chapter |
|-------------|--|---|--|
| Hospital | Creates hospital systems to provide hospital and | Yes/Yes | Chapters 281, 282, |
| Districts | medical care facilities. HDs must be voter | 100/ 100 | or 283 |
| | approved and have taxing authority. | | |
| Hospital | Creates hospital systems to provide hospital and | No/No | Chapter 262 |
| Authorities | medical care facilities. HAs are created by a | | |
| | municipality's governing board, do not require | | |
| | voter approval and do not have taxing authority. | | |
| Emergency | Provides rural fire prevention and emergency | Yes/Yes | Chapter 775 |
| Service | medical services. ESDs must be voter approved | | |
| Districts | and have taxing authority. | | |

| Mental | Provides child, adolescent, and adult mental | No/No | Chapter 534 |
|-------------|---|-------|-------------|
| Health & | health services; substance abuse recovery | | _ |
| Mental | services; and skills training. MHMRs do not | | |
| Retardation | require voter approval and do not have taxing | | |
| Centers | authority. | | |

Texas Public School District Debt

Much of Public School District (School District) debt is authorized under Chapter 45 of the Texas Education Code. School Districts issue four types of debt: voter approved, maintenance and operations (M&O), lease-revenue, and revenue. Charter school debt issued by nonprofit corporations is not included in School District debt. As of August 31, 2021, total School District debt outstanding was 36.7 percent (\$97.79 billion) of total local debt outstanding.

Over 98.55 percent of School District debt outstanding is voter approved. The proceeds from voterapproved debt can be used for school capital projects, such as buildings, renovations, technology, athletic facilities, school transportation, and performing arts, and to refund M&O debt. Voterapproved debt is subject to the 50-cent test that limits debt service (interest and sinking fund payments) to a maximum of \$0.50 per \$100 of valuation as described in the Texas Education Code, Section 45.0031. This debt must be approved by the voters prior to a school district issuing new debt.

M&O debt proceeds can be used for administration and operational costs of schools (teachers, buses, classrooms, etc.) but cannot be used for the new construction of school facilities. For M&O debt, only the maintenance tax is approved by the voters; once the voters approve the maintenance tax and the maximum rate, the maintenance tax debt may be issued without an election.

Lease-revenue obligations are issued by a public facility corporation created by a school district and used for acquiring, constructing, and equipping school facilities.

Proceeds from revenue debt issuances are mainly used to build and maintain sports facilities. Revenue and lease-revenue debt do not require voter approval.

Texas Other Special Districts and Authorities

Other Special Districts and Authorities (OSD) include tollway authorities, transit authorities, housing authorities, regional mobility authorities, power agencies, public utility agencies, road districts, events venue districts, education districts, and various economic and community development districts. As of August 31, 2021, total OSD debt outstanding was 7.4 percent (\$19.75 billion) of total local debt outstanding.

OSDs issue both tax-supported and revenue debt, including sales tax revenue and lease-revenue debt. OSD tax-supported and revenue debt are both used primarily for road improvements, economic and community development, water and sewer improvements, and developing and maintaining mass transportation systems. OSDs create conduit entities to issue debt on their behalf and for their benefit. The table below shows the various types of OSDs in the state.

| District | Purpose | |
|-------------------------------|--|--|
| Economic and Community | Community development, redevelopment, and strategic | |
| Development Districts | planning; public improvements necessary to serve the district. | |
| Education Districts | Provide services to the school districts and are funded by | |
| | education taxes at the county and the school district levels. | |
| Events Venue Districts | Items related to creating and maintaining venues. | |
| Housing Authorities | Programs to provide affordable housing. | |
| Power Agencies | Improvements to the electric transmission service. | |
| Public Utility Agencies | An agency created by two or more public entities to plan, | |
| | finance, construct, own, operate, or maintain facilities. | |
| Regional Mobility Authorities | Constructing and maintaining highways, tollways, ferries, | |
| | airports, bikeways, and all-purpose transportation centers. | |
| Road Districts | Constructing and maintaining roads. | |
| Tollway Authorities | Develop, construct, and maintain toll roads. | |
| Transit Authorities | Public transportation. | |

Texas Water Districts and Authorities

Texas Water Districts and Authorities (WDs) are local governmental entities that provide limited water-related services to customers and residents. WDs can be created by the Texas Commission on Environmental Quality, a county commissioner's court, or the legislature. WDs issue both tax-supported and revenue debt. (See generally, Texas Water Code, Chapters 49, 51, 54, 65, and Subtitle G of the Special District Local Laws Code). As of August 31, 2021, total WD debt outstanding was 14.9 percent (\$39.69 billion) of total local debt outstanding.

Texas has many types of WDs. The five most common types that provide services to residential customers are municipal utility districts (MUD), water control and improvement districts (WCID), special utility districts (SUD), river authorities (RA), and utility & reclamation districts (U&RD). The function of each is described below.

| District | Purpose | Authorizing Water Code Chapter |
|-------------------|--|--------------------------------|
| Municipal Utility | Provides waterworks systems, sanitary | Chapters 49 and 54 |
| Districts | sewer systems, and drainage systems. | |
| Water Control | Supplies and stores water for domestic, | Chapters 49 and 51 |
| and | commercial, and industrial use; operates | |
| Improvement | wastewater systems; and provides | |
| Districts | irrigation, drainage, and water quality | |
| | controls. | |
| Special Utility | Provides water, wastewater, and fire- | Chapters 49 and 65 |
| Districts | fighting services. | |
| River Authorities | Operates major reservoirs and sells | Chapter 30 |
| | untreated water on a wholesale basis. | |
| | Provides for flood control, soil | |
| | conservation, and water quality | |
| | protection. | |

| Utility & | Provides conservation and development |
|-------------|---|
| Reclamation | of all the natural resources within the |
| Districts | district. |

Tax-supported and revenue debt issued by WDs is used to pay capital costs to engineer, construct, acquire, and/or improve water plants, wastewater treatment facilities, and sewer system drainage. Certain WDs can also issue tax debt for road and park construction and create conduit entities to issue conduit revenue debt for pollution control facilities for private entities.

Appendix H Overview of Texas Local Government Rating Changes

Local Government Rating Changes

Approximately 83 issuers that issued debt in fiscal year 2021 received a tax-supported general obligation (GO) rating upgrade, and 21 issuers received a GO rating downgrade from at least one of the three major credit rating agencies, Fitch Ratings, Moody's Investors Service, and Standard & Poor's. Texas Bond Review Board (BRB) staff compared the GO rating assigned to issuers in fiscal year 2021 with their GO rating at the time of their last bond issuance. Rating changes that occur aside from the issuance of new debt in fiscal year 2021 are not considered in *Table H.1* and *Table H.2*.

Water Districts and Authorities (WDs) account for almost half of the upgrades with 34, followed by Public School Districts (School Districts) and Cities, Towns, Villages (Cities) with 27 and 18 upgrades, respectively (*Table H.1*). School Districts and Cities accounted for most downgrades with eight and six, respectively (*Table H.2*).

| Table H.1 | | | |
|---|---------------------|-----------------------|----------------------|
| Texas Local Government 2021 Issuers with GO Rating Upgrade Since Previous Issuance | | | |

Appendix I Glossary

Ad Valorem Tax – A tax based on the assessed value of real estate or personal property. Property ad valorem taxes are a major source of revenue for local governments.

Advance Refunding – A refunding in which the refunded obligation remains outstanding for a period of more than 90 days after the issuance of the refunding issue. The Tax Cuts and Jobs Act of 2017 eliminated the option of issuing a tax-exempt advanced refunding of a tax-exempt municipal debt after December 31, 2017.

Allotment – Amount of securities distributed to each member of the underwriting syndicate to fill orders.

Assessed Valuation – A municipality's worth in dollars based on real estate and/or other property for the purpose of taxation, sometimes expressed as a percent of the full market value of the community.

Authorized but Unissued – Debt that has been authorized for a specific purpose by the voters and/or the legislature but has not yet been issued. Authorized but unissued debt can be issued without the need for further legislative action.

Average Daily Attendance (ADA) – The number of students in ADA can be found by adding the number of students who are in attendance each day of the school year for the entire school year and then dividing that number by the number of instructional days in the school year.

Bond – A debt instrument in which an investor loans money to the issuer that specifies when the loan is due ("term" or "maturity" such as 20 years), the interest rate the borrower will pay (such as 5 percent), when the debt-service payments will be made (such as monthly, semi–annually, or annually), and the revenue source pledged to make the payments.

Bond Counsel – Attorney retained by the issuer to give a legal opinion that the issuer is authorized to issue the proposed securities, the legal requirements necessary for issuance have been met, and the proposed securities will be exempt from federal income taxation and state and local taxation where applicable.

Bond Insurance – A legal commitment by an insurance company to make timely payments of principal and interest in the event that the issuer of the debt is unable to make the payments.

Bond Proceeds – The money paid to the issuer by the purchaser or underwriter of a new issue of municipal securities. These funds are used to finance the project or other purpose for which the securities were issued and to pay certain costs of issuance as may be provided in the bond contract or bond purchase agreement. An issuer's net proceeds equal the issue price less the issuance fees. An investor's proceeds equal the maturity or sale value plus interest earned up to the maturity date or point of sale.

Build America Bonds (BABs) – A debt instrument created by the American Recovery and Reinvestment Act of 2009 (ARRA) that was issued as Tax Credit BABs or Direct-Payment BABs. Tax Credit BABs provide a tax credit to investors equal to 35 percent of the interest payable by the issuer. Direct-Payment BABs provide a direct federal subsidy payment to state and local governmental issuers equal to 35 percent of the interest payable. With the implementation of the Budget Control Act of 2011, the BAB subsidies have been reduced annually (see chart below). Authority to issue BABs expired in December 2010. See *Appendix E* for a discussion on BABs.

| Federal Fiscal Year | Sequestration Rate | Effective BAB Federal |
|-------------------------------|--------------------|----------------------------|
| (October 1 thru September 30) | Reduction | Subsidy Payment Percentage |
| 2021-2022 | 5.7% | 33.01% |
| 2020 | 5.9% | 32.94% |
| 2019 | 6.2% | 32.83% |
| 2018 | 6.6% | 32.69% |
| 2017 | 6.9% | 32.59% |
| 2016 | 6.8% | 32.62% |
| 2015 | 7.3% | 32.45% |
| 2014 | 7.2% | 32.48% |
| 2013 | 8.7% | 31.96% |

Capital Appreciation Bonds (CABs) – A municipal security in which the investment return (interest) on an initial principal amount is reinvested at a stated compounded rate until maturity. At maturity, the investor receives a single payment (the "maturity value") representing both the initial principal amount and the total investment return. CABs are distinct from traditional zero coupon bonds because the investment return is considered to be in the form of compounded interest rather than accreted original issue discount. For this reason, only the initial principal amount of a CAB is counted against a municipal issuer's statutory debt limit, rather than the total par value, as in the case of a traditional zero coupon bond. See *Chapter 4* for a discussion on CABs.

CAB Maturity Amount – The single payment for a capital appreciation bond that an investor receives at maturity, representing both the initial principal amount and interest. For capital appreciation bonds, compound accreted values are calculated as interest in the year of maturity.

CAB Par Amount – The face amount assigned to a capital appreciation bond at issuance and paid to the investor at maturity.

CAB Premium – The amount by which the price paid for a CAB security exceeds par value.

Certificate of Obligation (CO) – An obligation issued by a city, county, or certain hospital districts without the approval of voters to finance public projects. Although voter approval is not required, the sale can be stopped if 5 percent of the total voters in the taxing area sign a petition and submit it prior to approval of the ordinance to sell such certificates. See *Chapter 5* for a discussion on COs.

Certificate of Participation (COP) – A tax-exempt lease-financing agreement used by a municipality or local government in which an investor buys a share or participation in the revenue generated from the lease-purchase of the property or equipment to which the COP is tied. COPs do not require voter approval.

Charter School – Charter schools were created by the Texas Legislature in 1995 as part of the public school system. Under Texas Education Code, Chapter 12, the purpose of charter schools is to improve student learning, increase the choice of learning opportunities within the public school system, create professional opportunities that will attract new teachers to the public school system, establish a new form of accountability for public schools, and encourage different and innovative learning methods. See *Appendix C* for a discussion on charter schools.

Commercial Paper (CP) – Short-term, unsecured promissory notes that mature within 270 days and are backed by a liquidity provider (usually a bank) that stands by to provide liquidity in the event the notes are not remarketed or redeemed at maturity. See *Appendix F* for a discussion on CP.

Competitive Sale – A sale in which the issuer solicits bids from underwriting firms and sells the securities to the underwriter or syndicate offering the most favorable bid that meets the specifications of the notice of sale.

Component Unit (CU) – A legally separate entity for which the elected officials of the primary government (PG) are financially accountable. The nature and significance of the CU's relationship with the PG is such that exclusion from the PG's financial reports would be misleading or create incomplete financial statements.

Conduit Debt – Per the Governmental Accounting Standards Board (GASB), conduit debt obligations are issued by a state or local governmental entity for the express purpose of providing financing for a specific third party that is usually not a part of the issuer's financial reporting entity. GASB's most recent development of its definition of a conduit debt obligation states that the key characteristic should be that there are at least three participants: the government issuer, the third-party borrower, and the bondholder. Although conduit debt obligations bear the name of the governmental issuer, the issuer has no obligation for such debt beyond the resources provided by a lease or loan with the third party on whose behalf they are issued. See *Appendix B* for a discussion on conduit debt.

Conduit Issuer – An issuer, usually a government agency, that issues municipal securities to finance revenue-generating projects in which the funds generated are usually used by a third party (known as the conduit borrower or obligor) for debt-service payments.

Costs of Issuance – The expenses associated with the sale of a new issue of municipal securities, including underwriting costs, legal fees, rating agency fees, and other fees associated with the transaction.

Coupon – The interest rate paid on a security.

Counterparty Risk – The risk to each party in a swap contract that the counterparty will not fulfill its contractual obligations.

Current Interest Bond (CIB) – A bond in which interest payments are made on a periodic basis throughout the life of the bond as opposed to a bond (such as a capital appreciation bond) that pays interest only at maturity. This term is most often used in the context of a combination issuance of bonds that includes both capital appreciation bonds and current interest bonds.

Current Refunding – A refunding transaction in which the municipal securities being refunded will mature or be redeemed within 90 days or less from the date of issuance of the refunding issue.

CUSIP (Committee on Uniform Securities Identification Procedures) – A unique ninecharacter identification for each class of security approved for trading in the United States. CUSIPs are used to facilitate clearing and settlement for market trades.

Dealer Fee – The cost of underwriting, trading, or selling securities.

Debt Outstanding – The amount of unpaid principal on a debt that will continue to generate interest until paid off.

Debt per Capita – A measurement of the value of a government's debt expressed in terms of the amount attributable to each citizen under the government's jurisdiction. The formula is the debt outstanding as of August 31 divided by the estimated residential population of the issuer.

Debt Service – The amount that is required to cover the repayment of principal and interest on a debt for a particular period.

Defeasance – A provision that voids a debt when the borrower sets aside cash, securities, or investments sufficient to service the borrower's debt.

Derivative – A financial instrument whose value is based on one or more underlying assets. An example is a swap contract between two counterparties that specifies conditions (especially the dates, underlying variables, and notional amounts) under which payments are to be made between the parties.

Disclosure – The act of releasing, accurately and completely, all material information to investors and the securities markets for outstanding or to be issued securities.

Disclosure Counsel – An attorney or law firm retained by the issuer to provide advice on issuer disclosure obligations and prepare the official statement and/or continuing disclosure agreement.

Discount – The amount by which the price paid for a security is less than its par value.

Escrow – Fund established to hold monies or securities pledged to pay debt service.

Escrow Agent – Commercial bank or trust company retained to hold the investments purchased with the proceeds of an advance refunding and use the invested funds to pay debt service on the refunded debt.

Financial Advisor – A securities firm that assists an issuer on matters pertaining to a proposed issue such as structuring, timing, marketing, fairness of pricing, terms, and debt ratings.

Fiscal Year – Information is sorted on the fiscal year of the state, September 1 through August 31. Debt-service adjustments have been made for local governments with different fiscal years. Information is provided on cash, not accrual, basis.

Fixed Rate – An interest rate that does not change during the entire term of the obligation.

Forward or Forward Contract – A contract (variously known as a forward contract, forward delivery agreement, or forward purchase contract) wherein the buyer and seller agree to settle their

respective obligations at some specified future date based upon the current market price at the time the contract is executed. A forward may be used for any number of purposes. For example, a forward may provide for the delivery of specific types of securities on specified future dates at fixed yields for the purpose of optimizing the investment of a debt service reserve fund. A forward may provide for an issuer to issue and an underwriter to purchase an issue of bonds on a specified date in the future for the purpose of effecting a refunding of an outstanding issue that cannot be advance refunded.

General Obligation (GO) Debt – Debt backed by the credit and taxing power of the issuing jurisdiction.

Home Rule City – Cities are classified as either general law or home rule. A city may elect home rule status (i.e., draft an independent city charter) once it exceeds a population of \$5,000 and the voters agree to home rule. Otherwise, it is classified as general law and has very limited powers. One example of the difference in the two structures regards annexation. General law cities cannot annex adjacent unincorporated areas without the property owner's consent; home rule cities may annex without consent but must provide essential services within a specified period (generally within three years), or the property owner may file suit to be disannexed and reimbursed. Once a city adopts home rule, it may continue to keep this status even if the population later falls below 5,000.

I&S Debt – Interest & sinking fund debt is the debt-service outstanding on bonds issued by public schools for school capital projects such as buildings, renovations, technology, athletic facilities, school transportation, and performing arts, and to refund M&O debt. I&S bonds are backed by revenue from the I&S tax rate.

I&S Tax Rate – A public school district's property tax rate consists of an M&O tax rate and an I&S (interest and sinking fund) tax rate. The I&S tax rate provides funds for debt-service payments on debt that finances a district's facilities.

Indenture – Deed or contract, which may be in the form of a resolution, that sets forth the legal obligations between the issuer and the securities holders. The indenture also names the trustee that represents the interests of the securities holders.

Issuer – A legal entity that sells securities for the purpose of financing its operations. Issuers are legally responsible for the obligations of the issue and reporting financial conditions, material developments, and any other operational activities.

Lease Purchase – Financing the purchase of an asset over time through lease payments that include principal and interest. Lease purchases can be financed through a private vendor.

Lease-Revenue Bonds – Bonds issued by a nonprofit corporation or government issuer, which are secured by lease payments made by the local government or third-party borrower for use of specified property.

Letter of Credit – A credit enhancement used by an issuer to secure a higher rating for its securities. A letter of credit is usually a contractual agreement between a major financial institution and the issuer consisting of an unconditional pledge of the institution's credit to make debt-service payments in the event of a default.

Limited Tax General Obligation Bonds – A type of municipal bond that is guaranteed by the municipal government's pledge to use all legal resources, including the levying of property taxes, up to a set statutory limit. If a municipality exhausts the property tax resources for bond repayment within that limit, other revenue sources must be used for bond repayment.

Liquidity – The relative ability of a security to be readily traded or converted into cash without substantial transaction costs or loss in value.

Liquidity Provider – A financial institution that facilitates the trading of a security by insuring that it will be purchased if tendered to the issuer or its agent because it cannot be immediately remarketed to new investors.

Local Government Names – The names of governments used in this report are taken from the *Texas Property Tax Appraisal District Directory* published by the Texas State Comptroller of Public Accounts.

M&O Debt – Maintenance & operations debt is the debt-service outstanding on bonds issued by public schools. This debt can be used for administration and operational costs of schools (teachers, buses, classrooms, etc.) but cannot be used for the new construction of school facilities. M&O bonds are backed by revenue from the M&O tax rate.

M&O Tax Rate – A public school district's property tax rate consists of an M&O tax rate and an I&S tax rate. The M&O tax rate provides funds for the general operating fund, which pays for salaries, supplies, utilities, insurance, equipment, and other costs of day-to-day operations.

Maintenance Tax – Funds the maintenance and operation costs of a school district but cannot be used for new construction of school facilities.

Management Fee – A component of the underwriting spread that compensates the underwriters for assistance in creating and implementing the financing.

Maturity Date – The date principal is due and payable to the security holder.

Mortgage Credit Certificate – A certificate issued by certain state or local governments that allows a taxpayer to claim a tax credit for some portion of the mortgage interest paid during a given tax year.

Municipal Bond – A debt security issued to finance projects for a state or local government issuer. Municipal securities are typically exempt from federal taxes and from most state and local taxes.

Negotiated Sale – A sale in which an issuer selects an underwriting firm or syndicate to assist with the issuance process. At the time of sale, the issuer negotiates a purchase price for its securities with that underwriting firm or syndicate.

Notice of Sale – Publication by an issuer describing the terms of sale of an anticipated new offering of municipal securities.

Official Statement – The document published by the issuer that provides complete and accurate material information to investors on a new issue of municipal securities, including the purposes of the issue, repayment provisions, and the financial, economic, and social characteristics of the issuing government.

Par – The face value of a security that is due at maturity. A par bond is a bond selling at its face value.

Paying Agent – The entity responsible for processing debt-service payments from the issuer to the security holders.

Permanent School Fund – The Texas Permanent School Fund (PSF) was created in 1854 by the 5th Legislature expressly for the benefit of public schools. In addition, the Texas Constitution of 1876 stipulated that certain lands and proceeds from the sale of those lands would also be dedicated to the PSF. The Texas Constitution requires that distributions from the returns on the PSF be made to the Available School Fund to be used for the benefit of public and charter schools and allows the PSF to be used to guarantee bonds issued by public and charter schools.

Permanent School Fund Bond Guarantee Program (BGP) – The BGP was created in 1983 as an alternative for school districts to avoid the cost of private bond insurance by obtaining a PSF guarantee for voter-approved public school bond issuances. To qualify for the BGP guarantee, school districts and charter schools must be accredited by the state, have investment grade bond ratings (but below AAA), and have their applications approved by the Commissioner of Education. Bonds guaranteed by the BGP are rated AAA.

Premium – The amount by which the price paid for a security exceeds par value.

Premium Capital Appreciation Bond (PCAB) – A type of CAB that has a stated yield or accretion rate that is higher than its actual current yield to investors. This difference results in a lower initial stated par amount, which preserves debt capacity. See *Chapter 4* for a discussion on PCABs.

Principal – The face value of a bond, exclusive of interest.

Printer – A business that produces the official statement, notice of sale, and any bonds required to be transferred between the issuer and purchasers of the bonds. The costs associated with a printer are typically rolled into the costs of issuance.

Private Placement – A securities sale in which an issuer sells its securities directly to investors through a placement agent without a public offering.

Put Bond – A bond that allows the holder to force the issuer to repurchase the security at specified dates before maturity. The repurchase price is set at the time of issue and is usually par value.

Qualified Energy Conservation Bonds (QECB) – A bond that enables qualified state, tribal, and local government issuers to borrow money at attractive rates to fund energy conservation projects. While not a grant, a QECB is among the lowest cost public financing tools available because the U.S. Department of the Treasury subsidizes the issuer's borrowing costs.

Qualified School Construction Bonds (QSCB) – QSCBs must meet three requirements: 1) all of the bond proceeds must be used for the construction, rehabilitation, or repair of a public school facility, or for the acquisition of land on which such a bond financed facility is to be constructed; 2) the bond is issued by a state or local government within which such school is located; and 3) the issuer designates such bonds as a qualified school construction bond. For more information regarding QSCBs, contact the Texas Education Agency.

Qualified Zone Academy Bonds (QZAB) – QZABs are tax credit bonds in which the proceeds are used for renovating school buildings, purchasing equipment, developing curricula, and/or training school personnel. QZABs may not be issued for new construction. To qualify to issue QZABs, school districts must create a Zone Academy that is comprised of empowerment zones or enterprise communities comprised of public schools with 35 percent or more of their student body on the free and/or reduced lunch programs. For more information regarding QZABs, contact the Texas Education Agency.

Rating Agency – An entity that provides publicly available ratings of the credit quality of securities issuers, measuring the probability of the timely repayment of principal and interest on municipal securities.

Refunding Bond – A bond issued to retire or defease all or a portion of outstanding bonds.

Registrar – An entity responsible for maintaining ownership records on behalf of the issuer.

Remarketing Fee – Compensation to an agent for remarketing a secondary offering of short-term securities, usually for a mandatory or optional redemption or put (return of the security to the issuer).

Revenue Debt – Debt that is legally secured by a specified revenue source(s). Most revenue debt does not require voter approval and usually has a maturity based on the life of the project to be financed.

Sales Tax – A tax imposed by the government at the point of sale on retail goods and services. It is collected by the retailer and passed on to the state. Statutes, such as the Development Corporation Act, authorize certain issuers to pledge certain sales taxes to the repayment of debt for certain projects.

Sales Tax Revenue – Debt that is legally secured by a specified sales tax issued by certain cities for such purposes as constructing and improving municipal parks and recreation facilities/entertainment centers as well as hike and bike trails.

Selling Group – A group of municipal securities brokers and dealers who assist in the distribution of a new issue of securities.

Serial Bond – A bond issue in which a portion of the outstanding bonds matures at regular intervals until all of the bonds have matured.

Spread Expenses – A component of the underwriting spread representing the costs of operating the syndicate such as financial advisors, legal counsel, travel, printing, day loans, wire fees, and other associated fees.

Structuring Fee – A component of the underwriting spread that compensates the underwriters for assistance with developing a marketable securities offering within the issuer's legal and financial constraints.

Swap – A derivative in which counterparties exchange cash flows of one party's financial instrument for those of the other party's financial instrument.

Syndicate – A group of underwriters formed to purchase a new issue of securities from the issuer and offer it for resale to investors.

Takedown - A component of the underwriting spread representing the discount that the members of the syndicate receive when they purchase the securities from the issuer. Takedown is also known as the selling concession.

Tax and Revenue Anticipation Notes (TRAN) – Short-term loans that the issuer uses to address cash flow needs created when expenditures must be incurred before tax or other revenues are received.

Tax-Supported Debt – For local governments, tax-supported debt (sometimes called tax debt) is generally secured by a pledge of the issuer's ad valorem taxing power. Tax-supported debt can have either a limited or an unlimited authority pledge of tax revenues for repayment. For reporting purposes, when the public security contains both a tax and revenue pledge, the public security is categorized as tax-supported debt.

Term Bond – A bond issue in which all or a large part of the issue comes due in a single maturity. Term bond issuers make periodic payments into a sinking fund for mandatory redemption of term bonds before maturity or for payment at maturity.

Trustee – A bank or trust company designated by the issuer or borrower under the indenture or resolution as the custodian of funds. The trustee represents the interests of the security holders, including making debt-service payments.

Underwriter – An investment banking firm that purchases securities directly from the issuer and resells them to investors.

Underwriting Risk Fee – A portion of the underwriting spread designed to compensate the underwriter for the risk associated with market shifts and interest rate fluctuations.

Underwriting Spread – The amount representing the difference between the price at which securities are bought from the issuer by the underwriter and the price at which they are reoffered to the investor. The underwriting spread generally includes the takedown, management fee, expenses, and underwriting risk fee.

Underwriter's Counsel – An attorney who prepares or reviews the issuer's offering documents on behalf of the underwriter and prepares documentation for the underwriting agreement and the agreement among underwriters.

Underwriter's Risk – The risk of loss that could arise due to overestimated demand for an issuance or due to sudden fluctuations in market conditions borne by the underwriters until resale.

Unlimited Tax General Obligation Bond – A municipal bond that is backed by the pledge of the issuer to raise taxes, without limit, to service the debt until it is repaid.

Variable Rate – An interest rate that fluctuates based on market conditions or a predetermined index or formula. (Fixed rates do not change during the life of the obligation.)

Years to Maturity – The period of time for which a financial instrument remains outstanding. Maturity refers to a finite time period at the end of which the financial instrument will cease to exist and the principal is repaid with interest.

Yield – The investor's rate of return.

Zero Coupon Bond – A bond that is issued at a deep discount to its face value but pays no interest.
